NC ND 3 0 IGO license The Early Years analyzes the development of Latin American and Caribbean children and makes a compelling case for government intervention in what is instinctively a family affair Spending on effective programs for young children is an investment that if done well will have very high returns while failure to implement such programs will lower the returns on the hefty investments being made in primary secondary and higher education Policies for young children belong at the core of a country's development agenda alongside policies to develop infrastructure and strengthen institutions However if the services provided or funded by governments are to benefit children they must be substantially better than what is currently being delivered in the region This book offers suggestions for improving public policy in this critical area

Generation Jobless? P. Vogel, 2015-03-05 Offering guidance on the opportunities and threats for future generations and featuring interviews with business leaders this book provides a constructive look at change It directs the youth to become job creators not job seekers and to approach the corporate and political worlds with an entrepreneurial mind set *Innovation in China* William H.A. Johnson, 2015-07-22 The word innovation is often used today regarding China as if the concept were new to the Eastern country Most people know however that China was a juggernaut in creating new technologies and at one time was the innovation king of the world but that was at least seven centuries ago Today the great oriental power is attempting once again to take the throne of innovation for its own This desire to usurp the throne which had been diligently taken by the West during the Scientific Revolution has placed an almost unrealistic emphasis on innovation In *Innovation in China The Tail of the Dragon* the author explores the issues and actors involved in making innovation the emphasis in China He uses a simple systems model of innovation and various perceptual lenses The lenses are aimed at the historical economic

political legal educational and cultural elements of an innovation based society After reading the book the reader will understand more about how innovation is happening in China and by whom More importantly the reader will begin a journey of learning more about where the country is going as it relentlessly continues its drive to create an innovation based society and to become once again in terms appropriate to its history the Emperor of Innovation

The Inner Level Richard Wilkinson, Kate Pickett, 2018-06-07 Why is the incidence of mental illness in the UK twice that in Germany Why are Americans three times more likely than the Dutch to develop gambling problems Why is child well being so much worse in New Zealand than Japan As this groundbreaking study demonstrates the answer to all these hinges on inequality In *The Spirit Level* Richard Wilkinson and Kate Pickett put inequality at the centre of public debate by showing conclusively that less equal societies fare worse than more equal ones across everything from education to life expectancy *The Inner Level* now explains how inequality affects us individually how it alters how we think feel and behave It sets out the overwhelming evidence that material inequalities have powerful psychological effects when the gap between rich and poor increases so does the tendency to define and value ourselves and others in terms of superiority and inferiority A deep well of data and analysis is drawn upon to empirically show for example that low social status is associated with elevated levels of stress and how rates of anxiety and depression are intimately related to the inequality which makes that status paramount Wilkinson and Pickett describe how these responses to hierarchies evolved and why the impacts of inequality on us are so severe In doing so they challenge the conception that humans are innately competitive and self interested They undermine too the idea that inequality is the product of natural differences in individual ability This book sheds new light on many of the most urgent problems facing societies today but it is not just an index of our ills It demonstrates that societies based on fundamental equalities sharing and reciprocity generate much higher levels of well being and lays out the path towards them

World Development Report 2018 World Bank Group, 2017-10-16 Every year the World Bank's World Development Report WDR features a topic of central importance to global development The 2018 WDR *LEARNING to Realize Education's Promise* is the first ever devoted entirely to education And the time is right education has long been critical to human welfare but it is even more so in a time of rapid economic and social change The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education The 2018 WDR explores four main themes First education's promise education is a powerful instrument for eradicating poverty and promoting shared prosperity but fulfilling its potential requires better policies both within and outside the education system Second the need to shine a light on learning despite gains in access to education recent learning assessments reveal that many young people around the world especially those who are poor or marginalized are leaving school unequipped with even the foundational skills they need for life At the same time internationally comparable learning assessments show that skills in many middle income countries lag far behind what those countries aspire to And too often these shortcomings are hidden so as a first step to tackling this learning crisis it

is essential to shine a light on it by assessing student learning better Third how to make schools work for all learners research on areas such as brain science pedagogical innovations and school management has identified interventions that promote learning by ensuring that learners are prepared teachers are both skilled and motivated and other inputs support the teacher learner relationship Fourth how to make systems work for learning achieving learning throughout an education system requires more than just scaling up effective interventions Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress building coalitions for learning and taking an adaptive approach to reform

Learning as Development Daniel A. Wagner, 2017-10-04 Learning is the foundation of the human experience It begins at birth and never stops a continuous and malleable link across life stages of human development Disparities in learning access and outcomes around the world have deep consequences for income social mobility health and well being For international development practitioners faced with today's unprecedented environmental and geopolitical pressures learning should be viewed as a touchstone and target for those seeking to truly effect global change This book traces the path of international development work from its pre colonial origins to the emergence of economics as the dominant discipline in the field and lays out a new agenda for policymakers researchers and practitioners from early education through adulthood Learning as Development is an attempt to rethink international education in a changing world

Governance and sector outcomes Anna Wetterberg, Derick W. Brinkerhoff, 2018-09-27 A critical issue in international development is how donor funded programs can support sustainable and long lasting changes in assisted countries Among the factors associated with sustainability is improved governance However many donor funded initiatives are focused on achieving results in specific sectors such as health education and agriculture How can how governance interventions contribute to achieving sector specific results This brief explores this question and discusses how international development practice has incorporated recognition of the links between governance and sector outcomes The brief develops a stylized continuum of how governance elements relate to sector interventions and contribute to expected outcomes We discuss factors that either impede or impel governance integration and close with some observations regarding prospects for integrated programming The audience for the brief is the international development policy and practitioner communities and secondarily academics with an interest in the topic Key take aways include 1 there is ample evidence of positive contributions from improved governance to sector specific outcomes but few guideposts exist for practical and effective governance integration 2 barriers to integration include urgent sector priorities that overshadow governance concerns requirements to demonstrate progress towards ambitious sector targets and complex choices related to measurement and 3 sustainability and self reliance are major drivers for integration and are facilitated by the flexibility and adaptation that governance integration enables

Sri Lanka Education Sector Assessment Halil Dunder, Benoit Millot, Michelle Riboud, Mari Shoji, Harsha Aturupane, Sangeeta Goyal, Dhushyanth Raju, 2017-06-16 A country's education system plays a pivotal role in promoting

economic growth and shared prosperity Sri Lanka has enjoyed high school attainment and enrollment rates for several decades However it still faces major challenges in the education sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country The authors of Sri Lanka Education Sector Assessment Achievements Challenges and Policy Options offer a thorough review of Sri Lanka's education sector from early childhood education through higher education With this book they attempt to answer three questions How is Sri Lanka's education system performing especially with respect to participation rates learning outcomes and labor market outcomes How can the country address the challenges at each stage of the education process taking into account both country and international experience and also best practices Which policy actions should Sri Lanka make a priority for the short and medium term The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them To attain inclusive growth and become globally competitive Sri Lanka needs to embark on integrated reforms across all levels of education These reforms must address both short-term skill shortages and long-term productivity As Sri Lanka moves up the development ladder the priorities of primary secondary and postsecondary education must be aligned to meet the increasingly complex education and skill requirements
