

## Practical Subnetting 1

Based on the information in the graphic shown, design a network addressing scheme that will supply the minimum number of subnets, and allow enough extra subnets and hosts for 100% growth in both areas. Circle each subnet on the graphic and answer the questions below.

|   |                      |
|---|----------------------|
| Address class   | <i>B</i>             |
| Custom subnet mask  | <i>255.255.224.0</i> |
| Minimum number of subnets needed  | <i>4</i>             |
| Extra subnets required for 100% growth<br>(Round up to the next whole number)                           | <i>+ 4</i>           |
| Total number of subnets needed  | <i>= 8</i>           |
| Number of host addresses in the largest subnet group  | <i>60</i>            |
| Number of addresses needed for 100% growth in the largest subnet<br>(Round up to the next whole number) | <i>+ 60</i>          |
| Total number of address needed for the largest subnet   | <i>= 120</i>         |

Start with the first subnet and arrange your sub-networks from the largest group to the smallest.

|   |                                   |
|---|-----------------------------------|
| IP address range for Research                               | <i>172.16.0.0 to 172.31.255</i>   |
| IP address range for Marketing                              | <i>172.16.32.0 to 172.63.255</i>  |
| IP address range for Management                             | <i>172.16.64.0 to 172.95.255</i>  |

resources are meant primarily for students of Grade VI and are prepared accordingly for availing some background study materials to the fellow students. Some of such materials are from the conventional study materials prepared by different schools of well repute. Our main objective is to cover up different topics specified for the fellow students of the particular level of study. Some fundamental questions often strike our mind: Do we speak English properly? Do we write a passage properly? Do we always remain aware of the rules related to speeches while speaking? Do we always claim that whatever presented by us are absolutely correct? Obviously not. We try to represent our aspirations in writing during several instances. We also try to remain stick to rules related to speeches. All the time our representations may not be grammatically correct. Dialects of American origin are considerably different than compared to that of European origin. Our communicative represents an admixture of both the dialects by part. Font size of some of the practice papers are kept small for ensuring accommodation of the material of large volume. Students of higher class can explore them with an ease. They may not feel any specific problem while moving through content areas.
