Russian Jewish Diaspora and European Culture, 1917-1937 Jörg Schulte, Olga Tabachnikova, Peter Wagstaff, 2012-04-03 The Jewish emigration from Russia after the Revolution of 1917 changed the face of Jewish culture in Western Europe Russian Jews brought with them the visions of a national Jewish literature in Hebrew Yiddish or Russian and new concepts of secular Jewish music and art Often they acted as intermediaries between Jewish centres in Europe which resulted in the creation of a single sphere of Jewish culture common to all parts of the European diaspora Although some stayed in Western Europe for only a few years before moving on to Palestine the budding Hebrew culture in Palestine would not have been the same without this relatively short period of intense contact between Russian Jewish and Western European cultures **GEN**

The Making of Medieval Central Europe Martin Wihoda, 2024-08-26 Although the distant origins of medieval Central Europe have enjoyed constant interest among historians only marginal attention has been paid to

the power and political prerequisites for the first Westernization i.e. the gradual adoption of the values, norms and patterns of behavior of the Latin West by the communities gentes around the eastern edge of the Carolingian and subsequently Holy Roman Empires. Such a gap in knowledge long overlooked is now being filled by *The Making of Medieval Central Europe: Power and Political Prerequisites for the First Westernization 791-1122*. While respecting the state of research and based on an original analysis of the sources, this book offers an informed reflection of a complex dialogue that was initiated after the collapse of the Avar Khaganate at the end of the 8th century and that by the beginning of the 12th century gave rise to a Central Europe that was Westernized i.e. turned toward the West yet in many ways distinctive. Another and no less important added value of this book is the author's conscious effort to overcome the narrow interpretive matrices defined by the national interests of the time.

Medieval Europe From Another Angle Florin Curta, 2025-05-29 While the Middle Ages represent a topic of perennial interest, most studies have addressed the western parts of the European continent often from the angle of the written sources. This volume examines an area less known in the literary and archaeological evidence. The studies included therein provide significant insights into the history and archaeology of East Central and Eastern Europe during Late Antiquity and the early Middle Ages. This is the first volume of essays explicitly to reassess the significance of the region as well as the role of the archaeological evidence in studying ethnicity in the Middle Ages, particularly in the case of the Slavs and the Avars. Because of its geographic, chronological, thematic and methodological scope, this book offers a new perspective from a different angle on the analysis of the archaeological and written sources. Some chapters focus on settlement sites, others discuss artifacts from burial assemblages. As well as advancing new models for the analysis of the written sources in relation to ethnicity, *Medieval Europe from Another Angle* offers new approaches to the understanding of how ethnicity may have been constructed in the Middle Ages in material culture terms. It will appeal to scholars and students alike studying Late Antiquity and the early Middle Ages with an interest in material culture and its use in building ethnic boundaries.

Exodus 1-15 Helmut Utzschneider, Wolfgang Oswald, 2014-11-20 This commentary interprets the first part of the book of Exodus through 15:21. It features two approaches. On the one hand, the commentary interprets the final form of the traditional Hebrew text synchronically by means of form criticism and modern literary methods. On the other hand, it diachronically reconstructs the predecessors of the final form from its origins in an exodus composition that opposes political domination to the text's final form as a dramatic narrative about the transfer of sovereignty from the Pharaoh to the God of Israel. Concluding syntheses examine the relationship between these two interpretive approaches while adding reflections on traditional and contemporary concerns.

The Avar Siege of Constantinople in 626 Martin Hurbanič, 2019-07-25 This book examines the Avar siege of Constantinople in 626, one of the most significant events of the seventh century and the impact and repercussions this had on the political, military, economic and religious structures of the Byzantine Empire. The siege put an end to the power, politics and hegemony of the Avars in South East Europe and was the first attempt to destroy

Constantinople the capital of the Eastern Roman Empire Besides the far reaching military factors the siege had deeper ideological effects on the mentality of the inhabitants of the Empire and it helped establish Constantinople as the spiritual centre of eastern Christianity protected by God and his Mother Martin Hurbani discusses from a chronological and thematic perspective the process through which the historical siege was transformed into a timeless myth and examines the various aspects which make the event a unique historical moment in the history of mankind a moment in which the modern story overlaps with the legend with far reaching effects not only in the Byzantine Empire but also in other European countries
