Manual Vs Automated Information Processing:

The Rule of Law and Automated Decision-Making Markku Suksi, 2023-07-24 The book presents observations concerning automated decision making from a general point of view at the same time as it analyses the manner in which praxis in some jurisdictions has evolved as concerns automated decision making and how the requirements that are placed by the legal orders on it are formulated The principle of the rule of law should apply in the context of automated decision making of public authorities just as much as when the decision makers are physical persons In sync with increasing automatization of decision making in public authorities problematizing questions about the appropriate legal basis for algorithmic decision making have started emerge How should the principle of the rule of law apply within the area of automated decision making how should automated decision making be regulated so that it satisfies the requirements created by the principle of the rule of law and how should the principle of the rule of law be made concrete in decision making that is based on algorithms The proposal for an AI Act launched by the European Commission in April 2021 including an identification of high risk uses of algorithmic techniques raises further questions concerning practices and interpretations related to automated decision making The state based on the rule of law proceeds from the maxim that public powers are exercised within a legal frame that makes the exercise of public powers foreseeable in light of legal norms Also a state based on the rule of law requires that the contents of the exercise of public powers is regulated by legal norms which means that the citizens must be able to know everything that is relevant about how the powers will be exercised not only who it is that will exercise the powers Because of rules and principles of this kind including non discrimination and proportionality the exercise of powers will not become arbitrary *Integrating Drug Testing Into a Pretrial Services System* ,1993 **Indexing and Classification** Winifred F.
