**Building Transatlantic Italy** Paolo Scrivano, 2017-05-15 At the end of the Second World War America s newly acquired status of hegemonic power together with the launch of ambitious international programs such as the Marshall Plan significantly altered existing transatlantic relations In this context Italian and American architectural cultures developed a fragile dialogue characterized by successful exchanges and forms of collaboration but also by reciprocal wariness The dissemination of models and ideas concerning architecture generated complex effects and frequently led to surprising misinterpretations obstinate forms of resistance and long negotiations between the involved parties Issues of continuity and discontinuity dominated Italian culture and society at the time since at stake was the possible balance between allegedly long established traditions and the prospect of a radical rupture with recent history Architectural culture often contributed to reach a compromise between very diverging attitudes Situated in the larger realm of studies on Americanization this book questions current interpretations of transatlantic relations in architecture By reconsidering the means and effects of the dialogue that unfolded between the two sides of the Atlantic during the postwar years the volume analyzes how cultural and formal models were developed in one context and then modified when transferred to a new one as well as the fortune of this cultural exchange in terms of circulation amplification and simplification

de l'environnement du CNAM et par l'Institut national d'histoire de l'art ce volume rapproche les recherches sur la littérature technique et les travaux sur les livres d'architecture conduits au sein de ces institutions. Il croise ainsi les approches de chercheurs spécialistes de l'Histoire des sciences de l'histoire des techniques de l'histoire de l'art ou de l'architecture de l'histoire du livre et de l'histoire du droit. Sur une longue période de la naissance de l'imprimé jusqu'au XXe siècle, les contributions apportent des points de vue complémentaires par l'analyse des contenus ou de la forme des ouvrages. L'étude de leur destination et de leur réception ou encore par le décodage du contexte professionnel, institutionnel ou social de leurs publications. Au-delà d'une connaissance plus fine des relations complexes qui unissent depuis cinq cents ans les aspects matériels et intellectuels de la construction, ces convergences ouvrent des voies nouvelles pour interroger ce qui est davantage qu'un moyen ou une conséquence de l'émersion d'une discipline, une dimension part entière de l'acte d'écrire.

**spazio primario** Carlo De Carli, 1982     *Fondamenti della rappresentazione architettonica* Vittorio Ugo, 2020-05-01 Tra il universo discorsivo teorico critico storico e quello fisico materiale spaziale costruttivo dell'architettura la rappresentazione chiamata a svolgere un fondamentale ruolo di raccordo garantendo simultaneamente una doppia funzionalità nella direzione ermeneutica ed in quella euristica. Nell'analizzarne le diverse articolazioni il libro si propone di costruirne e descriverne i fondamenti ed i modi di appartenenza ai processi della progettazione e della documentazione critica. La rappresentazione dell'architettura si costruisce quindi quale momento essenziale nella determinazione della sua forma architettonica e nelle relazioni che questa instaura con l'abitare le geometrie e le strutture epistemologiche e poetiche del pensiero. Oltre alla nozione di forma alla mimesis ed alle sottili questioni che questa solleva in campo architettonico per esempio sono infatti i principali strumenti concettuali di riferimento che il libro discute e pone alla base della rappresentazione nel suo aspetto di luogo privilegiato di formazione del progetto e della documentazione critica.
