University Auditing in the Digital Era Sezer Bozkus Kahyaoglu,Erman Coskun,2022-04-05 This book explores how digital transformation is reshaping the manner in which higher education sectors emerge work and evolve and how auditors should respond to this challenging and risky digital audit universe in transforming the higher education system It serves to help professionals to understand the

reality of performing the Chief Audit Executive CAE role in today's evolving business economy specifically in the higher education sector. It compares and contrasts the stated IIA standards with the challenges and realities auditors may face and provides alternative scenarios to gaining a seat at the table. This book also provides insight into critical lessons learned when executing the CAE role relevant for digitally transforming universities. The main purpose of this study is to rethink the audit culture in the digital era and reveal the key characteristics that are open for improvement so that digitally transforming universities can be audited according to the higher education standards with a digitally supported value added audit approach. Based on this approach, the audit culture is reassessed considering the digital university conceptual framework and business model. There are two main points to consider for the digital university work environment: traceability and auditability. In this respect, policy recommendations are made for best practices to achieve value added digital audits in transforming universities. The book has been written from both the reality and academic perspectives of two experienced authors. Sezer is a past CAE, CEO and long-term senior internal auditor who has worked in the internal audit role for various listed companies, financial institutions and government entities. Erman has extensive information technology and university accreditation knowledge in the global higher education sector. This brings a blend of value added approaches to the readers and speaks to issues about understanding and dealing with audit culture and business evolution in digitally transforming organizations along with the requirements for upholding IIA standards. Geared toward the experienced or new CAE, *University Auditing in the Digital Era: Challenges and Lessons for Higher Education Professionals and CAEs* can be a tool for all auditors to understand some of the challenges, issues and potential alternative solutions when executing the role of university auditing. In addition, it can be a valuable reference for university administrators and CIOs as well as academics and all stakeholders related to the higher education sector.

Ultimate Guide to CGRC Certification Arun Kumar Chaudhary, 2025-05-23

DESCRIPTION In today's interconnected world, organizations face increasing challenges in managing the complex landscape of information security, risk, and compliance. This book provides a practical framework for navigating these challenges, enabling professionals to establish and maintain robust systems that protect sensitive data, adhere to regulatory requirements, and mitigate potential threats. This book covers the core domains of CGRC, beginning with foundational security principles, governance structures, and risk assessment, including standards like NIST RMF and SP 800-53. This book offers a comprehensive analysis of GRC fundamentals, such as risk management, internal controls, compliance, corporate governance, control selection, implementation, and enhancement, and addressing frameworks like CIS Benchmarks and privacy regulations, including GDPR and PDPA. The book also contains sample questions, case studies, and real-world examples to show the application of GRC concepts in different organizational settings. Security professionals can make various pathways with regulatory requirements, compliance standards, sectors of industry, and managed environments. By learning the concepts and techniques in this book, readers will develop the expertise to effectively manage security risk and compliance within their
