Hartwig,Carlos Aggio,2023-01-09 Only three out of five children are enrolled in preschool globally and only one out of five in low income countries yet the expansion of preschool education came to a near standstill in 2020 To restart it we propose a policy instrument called the Preschool Entitlement It entails the right of every child to 600 hours of quality government funded preschool education per year 3 hours per day 5 days per week 40 weeks per year Existing preschool institutions and other organizations with legal status public private faith or community based can offer the child development program after a process of rigorous accreditation to ensure quality inclusion and safety In other respects they will have the freedom to shape the program according to local circumstances and local preferences This makes it possible to supplement the daily 3 hours with additional hours of childcare that can be financed by families local government employers national associations faith based organizations ministries of social affairs or others In this manner the Preschool Entitlement reconciles local autonomy with governmental responsibility for quality access and equity In low and middle income countries government costs would range from about 0.15 to 0.4 percent of GDP and the benefits are likely to be significant

Informe de Seguimiento de la EPT en el Mundo - 2013-2014 UNESCO,2014-04-30 *Handbook of Contemporary Education Economics* Geraint Johnes,Jill Johnes,Tommaso Agasisti,Laura López-Torres,2017-12-29 This Handbook provides a comprehensive overview of the modern economics of education literature bringing together a series of original contributions by globally renowned experts in their fields Covering a wide variety of topics each chapter assesses the most recent research with an emphasis on skills evaluation and data analytics Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations for Fiscal Year 2014 United States. Congress. Senate. Committee on Appropriations. Subcommittee on Departments of Labor, Health and Human Services, Education, and Related Agencies,2014 The Inner Level Richard Wilkinson,Kate Pickett,2018-06-07 Why is the incidence of mental illness in the UK twice that in Germany Why are Americans three times more likely than the Dutch to develop gambling problems Why is child well being so much worse in New Zealand than Japan As this groundbreaking study demonstrates the answer to all these hinges on inequality In *The Spirit Level* Richard Wilkinson and Kate Pickett put inequality at the centre of public debate by showing conclusively that less equal societies fare worse than more equal ones across everything from education to life expectancy *The Inner Level* now explains how inequality affects us individually how it alters how we think feel and behave It sets out the overwhelming evidence that material inequalities have powerful psychological effects when the gap between rich and poor increases so does the tendency to define and value ourselves and others in terms of superiority and inferiority A deep well of data and analysis is drawn upon to empirically show for example that low social status is associated with elevated levels of stress and how rates of anxiety and depression are intimately related to the inequality which makes that status paramount Wilkinson and Pickett describe how these responses to hierarchies evolved and why the impacts of inequality on us are so severe In doing so they challenge the

conception that humans are innately competitive and self interested They undermine too the idea that inequality is the product of natural differences in individual ability This book sheds new light on many of the most urgent problems facing societies today but it is not just an index of our ills It demonstrates that societies based on fundamental equalities sharing and reciprocity generate much higher levels of well being and lays out the path towards them
