*Productivity in Higher Education* Caroline M. Hoxby, Kevin Stange, 2020-01-10 How do the benefits of higher education compare with its costs and how does this comparison vary across individuals and institutions

These questions are fundamental to quantifying the productivity of the education sector. The studies in *Productivity in Higher Education* use rich and novel administrative data, modern econometric methods, and careful institutional analysis to explore productivity issues. The authors examine the returns to undergraduate education, differences in costs by major, the productivity of for-profit schools, the productivity of various types of faculty, and of outcomes, the effects of online education on the higher education market, and the ways in which the productivity of different institutions responds to market forces. The analyses recognize five key challenges to assessing productivity in higher education: the potential for multiple student outcomes in terms of skills, earnings, invention, and employment; the fact that colleges and universities are multiproduct firms that conduct varied activities across many domains; the fact that students select which school to attend based in part on their aptitude; the difficulty of attributing outcomes to individual institutions when students attend more than one; and the possibility that some of the benefits of higher education may arise from the system as a whole rather than from a single institution. The findings and the approaches illustrated can facilitate decision-making processes in higher education.

Naked Money: A Revealing Look at Our Financial System Charles Wheelan, 2016-04-04 Charles Wheelan's wonderfully whimsical best-selling *Naked* series tackles the weird, surprisingly colorful world of money and banking. Consider the 20 bill: It has no more value as a simple slip of paper than Monopoly money. Yet even children recognize that tearing one into small pieces is an act of inconceivable stupidity. What makes a 20 bill actually worth twenty dollars? In the third volume of his best-selling *Naked* series, Charles Wheelan uses this seemingly simple question to open the door to the surprisingly colorful world of money and banking. The search for an answer triggers countless other questions along the way: Why does paper money, fiat currency, if you want to be fancy, even exist? And why do some nations like Zimbabwe in the 1990s print so much of it that it becomes more valuable as toilet paper than as currency? How do central banks use the power of money creation to stop financial crises? Why does most of Europe share a common currency, and why has that arrangement caused so much trouble? And will payment apps, bitcoin, or other new technologies render all of this moot? In *Naked Money*, Wheelan tackles all of the above and more, showing us how our banking and monetary systems should work in ideal situations and revealing the havoc and suffering caused in real situations by inflation, deflation, illiquidity, and other monetary effects. Throughout, Wheelan's uniquely bright-eyed whimsical style brings levity and clarity to a subject often devoid of both. With illuminating stories from Argentina, Zimbabwe, North Korea, America, China, and elsewhere around the globe, Wheelan demystifies the curious world behind the paper in our wallets and the digits in our bank accounts.

*The Challenge of Independent Colleges* Christopher C. Morphet, John M. Braxton, 2017-12-01 At the intersection of new scholarship on higher education with on-the-ground insight into managing institutions, this book began as a collaboration among top higher education researchers: the Association for the Study of Higher Education (ASHE) scholars and the Council of Independent Colleges (CIC). Documenting the challenges and opportunities facing independent colleges in several integral areas, including public purposes and student

engagement The Challenge of Independent Colleges is informed by the reactions of independent campus presidents and provosts who work every day to act on the opportunities presented by private colleges and universities Each of the nine chapters is written by a leading higher education scholar and frames highly relevant issues for administrators at independent colleges and universities Topics range from Access and Affordability and Assessment to Ensuring Student Success and Institutional Strategy Each chapter is followed by a short critical reaction written by a provost or president at a CIC member institution These reactions demonstrate how the information contained in the chapter might be used by institutional leaders to make decisions and what other information on the chapter s topic might be useful for leaders at independent colleges and universities An important resource for higher education scholars and campus leaders this text will also be a useful addition to courses on education Contributors John M Braxton Erin B Ciarimboli Cynthia Cogswell Valerie Cresp n Trujillo Daniel Custer Richard Dorman Roger Drake Richard Ekman David Guthrie Harold V Hartley III James C Hearn Nicholas Hillman Jillian Kinzie Mary B Marcy Matthew J Mayhew Charlie McCormick Linda McMillin Christopher C Morphew Julie J Park Laura W Perna Kevin M Ross Marc Roy Laurie Schreiner Carolyn J Stefano Barrett Taylor Stephen J Vassallo David J Weerts Cynthia A Wells Letha Zook

Milton,2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don t work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew s latest interview with Seattle Radio <http://kiroradio.com> listen 9972862 PISA Equations and Inequalities Making Mathematics Accessible to All OECD,2016-06-20 More than ever students need to engage with
