Math Wars Carmen Latterell,2004-12-30 This book is written for parents and other interested parties so that they can understand the great debate taking place in many states in this country about how to teach basic math The debate centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and traditional curricula the curricula that NCTM oriented replaced the term Math Wars was coined to describe them Parents are concerned about their children s math learning Teachers are concerned about math teaching When parents see what children are bringing home under the new curriculum it is clear that their children are not working on the same mathematics that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary mathematics courses are the fear of many students The standards created by the NCTM

do not necessarily prepare students for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for parents to do anything about the confusing state of mathematics education This book provides some answers ENC Focus ,2001 **Catalog of Copyright Entries. Copyright Office,1968 Addressing the Needs of All Learners in the Era of Changing Standards Katherine S. McKnight,2016-06-08

The new standards were written to address the harsh realities for poor performance of American students across all grades levels k 12 According to NAEP National Assessment of Educational Progress data more than 60% of our students in grades 4 8 and 12 are not proficient readers and the United States is one of the lowest performing in mathematics The statistics are even more staggering for our children who live in poverty students with disabilities and English Language Learners The new standards have sent a clear message all students must be engaged deeper learning This deeper level of understanding and comprehension is communicated through a more sophisticated and independent level of applied literacy skills In this book some of our leading educators envision the standards as a vehicle to provide more rigorous instruction and illustrate how teachers are uniquely qualified to determine the most effective methods for developing students skills and close the achievement gap
