

TRIMBLE R4 GNSS SYSTEM

KEY FEATURES

Trimble R-track satellite tracking technology

Includes Trimble Maxwell II chip with 120 channels

Scalable from postprocessing to VRS to multi-constellation RTK configurations

Cable-free for convenience

Accurate, reliable and rugged systems

Trimble Slate controller

DEPENDABLE WHEN EVERY POINT COUNTS

Designed for surveys looking for easy-to-use GNSS technology, the Trimble® R4 GNSS System performs under even the most rigorous conditions. GNSS support upgrade options, integrated Trimble R-track™ satellite tracking technology, and a straightforward system design result in a system that is flexible, reliable, and rugged.

A COMPLETE GNSS SYSTEM

Lightweight, convenient and cable-free, the Trimble R4 GNSS system with Trimble Access™ field software provides the ease of use of an integrated receiver and everything you need to perform a basic survey campaign.

The dual-frequency antenna enhances tracking capacity and delivers sub-millimeter phase center stability for precise results in demanding conditions. Internally powered with removable batteries, this system provides a full working day of uninterrupted field operation.

ADVANCED TRIMBLE R-TRACK TECHNOLOGY

The Trimble R4, powered with a Trimble Maxwell™ II chip with 120 channels, delivers the accuracy and reliability required for precision surveying with superior tracking and RTK performance. With GPS L2C and the Japanese QZSS support included, you can track more satellites and measure more successfully in challenging environments. L2C provides more than just additional signals – the advanced signal structure provides better strength for more reliable satellite tracking.

Trimble R-track satellite tracking technology delivers reliable, precise positioning performance. Trimble R-track with Signal Prediction™ compensates for intermittent or marginal RTK correction signals, enabling extended precision operation after an RTK signal is interrupted.

The ICD-100 communications protocol provides correction compensators for optimized bandwidth and full utilization of all the satellites in view, giving you reliable positioning performance.

CHOOSE THE LEVEL OF GNSS SUPPORT YOU REQUIRE TODAY

Choose the level of GNSS support you require today with the Trimble upgrade options available on the Trimble R4. Founded on proven GNSS technology, the Trimble R4 comes standard with GPS L1, L2, L2C and QZSS. Beyond this standard GNSS support, the Trimble R4 offers upgrades for GLONASS, Galileo, and BeiDou (COMPASS)—just choose what you need.

FUNCTIONS AS A VRS ROVER, RTK ROVER, OR FIELD BASE STATION

Use as a lightweight rover for static surveying or RTK. The Trimble R4 is also completely compatible with Trimble VRS™ solutions, creating a VRS rover for use inside real-time networks. With a built-in 450 MHz receive-only radio or a fully integrated G3XHGPS radio, this system can be adapted to meet a variety of needs. As a base station, the Trimble R4 with the integrated UHF transmit option is rugged, weather-resistant and compatible with a range of radio solutions.

A DEDICATED, RELIABLE GNSS FIELD SOLUTION

For the Trimble R4 with Trimble Access and the Trimble Slate Controller¹ for a dedicated GNSS solution that is effective for both real-time and postprocessed GNSS surveys.

Powerful, connected, and compact, the Trimble Slate Controller condenses the convenience and ease-of-use of a smartphone with the durability for which Trimble is known. Its slim, ergonomic design is easy to grasp and its screen provides superior sunlight readability enabling all-day use by hard-working survey professionals.

Trimble Access field software provides specialized and customized workflows to make surveying tasks quicker and easier while enabling teams to communicate vital information between field and office in real-time.

Survey companies can also implement their unique workflows by taking advantage of the customization capabilities available in the Trimble Access Software Development Kit (SDK).

Need to get data back to the office immediately? Benefits from real-time data sharing via Trimble Access Services, now available with any valid Trimble Access maintenance agreement.

Back in the office, users can seamlessly process data with Trimble Business Center office software.

The Trimble R4 GNSS system – ready and reliable for your everyday surveying needs.

1. The Trimble R4 Controller is available in Trimble R4C, Trimble R4S or Trimble Slate. Rugged RTK with the purchase of an advanced data collection option.
