

Reflection/Transmission

1. a. Sketch the pulse before the pulse and after reflection following from a fixed end

- b. Sketch the pulse as it travels after reflecting from a free end

2. The diagram on the right shows a pulse travelling from a "light" string to a "heavy" string. Reflections follow above the horizontal and transmission follows below the horizontal marked point P.

3. The diagram on the right shows a pulse travelling from a "heavy" string to a "light" string. (Draw the reflected and transmitted pulses after the marked point P)

Now swap the labels for heavy and light for the next two. This may seem to contradict the preceding two cases. This does not, as the wave speed is greater in the lighter string and the lighter end of the string moves with twice the amplitude of the heavier end of the string.

4. Sketch a pulse in a light rope approaching a heavy rope. Mark the two rope surfaces (one is the fixed end of the rope)

5. The right is a rope rope system consisting of pulse coming from right

6. If the right rope is the heavy rope, what did the student do? (The part where the rope was fixed? Or rope was not fixed, rope was not fixed, rope was not fixed and it was fixed to a wall or fixed to a wall)

7. If the right rope is the heavy rope, what did the student do? (The part where the rope was fixed? Or rope was not fixed, rope was not fixed, rope was not fixed and it was fixed to a wall or fixed to a wall)
