Appearance in Reality John Heil, 2021-09-16 In Appearance in Reality John Heil addresses a question at the heart of metaphysics how are the appearances related to reality how does what we find in the sciences comport with what we encounter in everyday experience and in the laboratory Objects for instance appear to be colourful noisy self contained and massively interactive Physics tells us they are dynamic swarms of colourless particles or disturbances in fields or something equally strange Is what we experience illusory present only in our minds But then what are minds Do minds elude physics Or are the physicist's depictions mere constructs with no claim to reality Perhaps reality is hierarchical physics encompasses the fundamental things the less than fundamental things are dependent on but distinct from these Heil's investigation advances a fourth possibility the scientific image what we have in physics affords our best guide to the nature of what the appearances are appearances of

Collected Articles on the Existence of God Gaven Kerr, 2022-10-15 The twentieth century witnessed an explosion of scholarly interest in the philosophical thought of St Thomas Aquinas One of the fruits of that Thomistic revival was an uncovering of St Thomas's original contributions to many areas of philosophy not least metaphysics In the twenty first century there has been renewed

interest in Aquinas's argumentation for the existence of God. This interest flows from an engagement with the work of the twentieth century scholars in presenting Aquinas's own characteristic metaphysics. What we have seen is an interpretation and presentation of Aquinas's proofs for God's existence in terms of Thomas's unique insights into the nature of being and the metaphysical structure of reality. Gaven Kerr has been one such author who has contributed in numerous ways to the revival of interest in Aquinas's argumentation for the existence of God and its metaphysical buttressing. Over the last ten years Kerr has published articles on Aquinas's various proofs for God's existence and the metaphysics standing behind those proofs; this volume draws together those articles. Herein are included Kerr's articles on per se ordered series, existential inertia, the proof in *De Ente et Essentia*, the argument from motion in the *Summa Contra Gentiles*, and the five ways themselves. Kerr has also written two new articles for this volume: one on the possibility of demonstrating God's existence and the other on how to move from God's existence to God's nature. This volume offers an overview of Kerr's thinking over the last decade on Aquinas's thought on the existence of God. **Donald Davidson** Kirk Ludwig, 2003-07-28 Table of contents

The Philosopher's Index, 2008 Vols for 1969 include a section of abstracts New Conversations on the Problems of Identity, Consciousness and Mind Jonathan O. Chimakonam, Uti Ojah Egbai, Samuel T. Segun, Aribiah D. Attioe, 2019-02-23 This book introduces concepts in philosophy of mind and neurophilosophy. Inside, three scholars offer approaches to the problems of identity, consciousness, and the mind. In the process, they open new vistas for thought and raise fresh controversies to some of the oldest problems in philosophy. The first chapter focuses on the identity problem. The author employs an explanatory model he christened sense phenomenism to defend the thesis that personal identity is something or a phenomenon that pertains to the observable, perceptible aspect of the human person. The next chapter explores the problem of consciousness. It deploys the new concept equiphénoménisme as a model to show that mental properties are not by-products but necessary products of consciousness. Herein, the notion of qualia is a fundamental and necessary product that must be experienced simultaneously with neural activities for consciousness to be possible. The last chapter addresses the mind-body problem. It adopts the new concept proto phenomenism as an alternative explanatory model. This model eliminates the idea of a mind. As such, it approaches the mind-body problem from a materialistic point of view with many implications, such as the meaninglessness of our existence, the possibility of thought engineering, as well as religious implications. **Actual Consciousness** Ted Honderich, 2014 What is it for you to be conscious? There is no consensus in philosophy or science; it has remained a mystery. Ted Honderich develops a brand new theory of consciousness according to which perceptual consciousness is external to the perceiver. It exists in a subjective physical world dependent on both you and the objective physical world.
