

Standardized Test Preparation

READING

Read each of the passages below. Then, answer the questions that follow each passage.

Passage 1 Heart disease is the leading cause of death in the United States. Heart disease causes more than 900,000 deaths per year. These deaths constitute 40% of all deaths in the United States. Twenty-five percent of deaths due to heart disease occur in people under the age of 65. But death rates are improving. Death rates for the 10-year period ending in 1985 were 30% less than they were for the previous 10-year period. This decline in mortality is related to a decrease in risk factors for heart disease and improvements in diagnosis and treatment.

1. In the passage, what does *constitute* mean?
A to propose
B to make up
C to follow
D to concern
2. Which of the following can be inferred from the passage?
F The number of deaths due to heart disease is greater in the United States than in any other country in the world.
G The number of deaths due to heart disease has not changed since 1985.
H Changes in risk factors have decreased the number of deaths due to heart disease.
I Nothing can be done to prevent deaths from heart disease.
3. What percentage of deaths due to heart disease occur in people under the age of 65?
A 10%
B 25%
C 30%
D 40%

Passage 2 Your kidneys clean your blood. They also help regulate the amount of water in your body. When blood enters a kidney, the blood contains nutrients, gases, water, and waste products. The kidney must remove wastes and excess water from the blood while leaving other substances in the blood. Inside your kidneys are nephrons, which are microscopic filters that remove harmful products from your blood. The nephrons remove the wastes from the blood through the process of filtration. The waste products are then mixed with excess water to form a liquid called *urine*. The urinary system then removes the urine and excess water from your body.

1. What are the main functions of your kidneys?
A to make nephrons and mix water
B to remove urine and excess water from your body
C to remove blood from water and waste products
D to clean your blood and regulate the amount of water in your body
2. According to the passage, what are nephrons?
F nutrients in your blood
G microscopic filters in your kidneys
H waste products that must be removed from your blood
I parts of the urinary system
3. According to the passage, what kinds of chemicals can be found in your blood?
A water, gases, and nutrients
B urine and water
C nephrons and waste products
D poisons and medicines

Holt People, Places, and Change Robert J. Sager, 2003 Curriculum Review, 1980 Processes, Mechanisms and Solutions in Coastal Wetland to Adapt to Changing Environment Qing Wang, Dongdong Shao, Yu Zhang, Qin Zhu, 2025-06-05 Coastal wetlands provide precious ecological services for us like coastal protection carbon storage flooding mitigation production and so on Mangrove saltmarsh sea grass oyster reef and coral reef are typical types of coastal wetland each type has its unique adaptive strategy to climate change through some processes and mechanisms Some of them are well known to us but most are unrecognized as they are far away from our living environment Furthermore in the context of climate change and anthropogenic influence the external disturbance is more complicated and changeable causing the responses of species and the related processes more secluded and unpredictable Therefore the multilevel processes or mechanisms in coastal wetland to adapt to climate change as well as the solutions is urgent and important to face the new challenges Coastal wetlands lie in the transition zone between lands and seas defending us from storms and floodings and providing important and valuable ecosystem services such as carbon stock and biodiversity maintenance However coastal wetlands are vulnerable and are one of the most physically disturbed ecosystems on earth because they are always in hydrodynamic conditions under the interactions among tides waves runoffs and so on Furthermore the combined impacts of climate change and human activities have caused more uncertainties and complexities on the environmental factors which imposed unparalleled impacts on the diversity distribution and ecological performance of coastal wetland ecosystem globally

Holt Environmental Science Chapter 5 Review Answer Key Book Review: Unveiling the Power of Words

In some sort of driven by information and connectivity, the ability of words has be evident than ever. They have the capability to inspire, provoke, and ignite change. Such could be the essence of the book **Holt Environmental Science Chapter 5 Review Answer Key**, a literary masterpiece that delves deep to the significance of words and their effect on our lives.
