Manifesto proposes practical action that will make a difference including in the problematic technological and ecological context of humanity's immediate and long term future. The book is unique and innovative for it moves adventurously across very broad territory. The Manifesto draws from world philosophic arguments including specifically a critique of liberalism further exploring sociology, cultural anthropology, politics, primatology and early humanity even quantum physics. Argument is set within mainstream post 1972 economics and political economics as well as direct practical experience working to empower disadvantaged communities through the United Nations. Most importantly the book's analysis is deeply informed by the practice of searching for what is sacred, the ultimate essence of our humanity, what we can be as a human race empowered, fulfilled individuals deeply sharing and caring for each other across our separate cultures and lives. Stomu Yamashita's On Zen performances set the context for the Symposia bringing different religions and cultures together across their dividing boundaries into a coherent search for peace and harmony through sacred music. Informed by alternate cultural paradigms for economics, the book probes deeply into philosophies and practices that already exist within Eastern and Western societies and offer lessons for our future. The result is an economics that stresses harmony with nature and balance in social relations. It places an emphasis on community, human sharing and trust as a platform for our future, not separate from the global economy but integrated into its very foundations. This is a book for all who care, a plan for our sustainable future built from the best of what our humanity is and can offer.
