English Paper2 Fal June 2015:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. Homer's Living Language Chiara Bozzone, 2024-04-11 What if formularity meter and Kunstsprache in Homer weren't abstract mechanical systems that constrained the poet's freedom but rather adaptive technologies that helped poets to sustain feats of great creativity? This book explores this hypothesis by reassessing the key formal features of Homer's poetic technique through the lenses of contemporary linguistics and the cognitive sciences as well as by drawing some unexpected parallels from the contemporary world from the dialects of English used in popular music to the prosodic strategies employed in live sports commentary to the neuroscience of jazz improvisation. Aimed at Classics students and specialists alike this book provides thorough and accessible introductions to the main debates in Homeric poetics along with new and thought provoking ways of understanding Homeric creativity. L. S. Vygotsky and English in Education and the Language Arts Peter Smagorinsky, 2023-10-09 L. S. Vygotsky and English in Education and the Language Arts focuses on the hugely significant contributions of L. S. Vygotsky to research theory and practice in English and the Language Arts exploring the relevance of Vygotsky's works for today's teachers and researchers. Drawing on his 30 years of study Smagorinsky interprets Vygotsky in relation to literacy education teacher education special education and how life outside school has an impact on how people function within them. This insightful and accessible text firstly explores Vygotsky's early life to situate him historically and culturally and goes on to trace his understanding of human psychology as it relates to the social contexts of schools and pupils' lives at home. Vygotsky's pedagogical ideas are then discussed in depth with specific attention on the role of emotions the zone of proximal development expanding textuality beyond writing and his belief in the primacy of socialization. This book illuminates new areas of understanding and challenges common perceptions available through limited and selective readings establishing Vygotsky as a complex developmental psychologist rather than a classroom practitioner. With points for discussion and reflection provided throughout this text will be invaluable for student teachers teachers and academics in the field of English and the Language Arts. **PICAO Monthly Bulletin**, 1946 **Yearbook of International Organizations**

Development Banks and Sustainability in the Andean Amazon Rebecca Ray, Kevin P. Gallagher, Cynthia A. Sanborn, 2019-10-10 This book explores what development banks governments and communities have learned in the last decade of careful negotiation between social and environmental protections in the Andean Amazon and the pressures of a surging infrastructure and development boom While mega dams highways and ports are filling up the pipelines of planners the national governments of Andean and Amazon basin countries and major development banks have enacted ambitious social and environmental protections The book traces the development of social and environmental protections after years of struggle by affected communities going beyond official policies to discover how these reforms work in practice and ultimately whether they are enough to stem the risks of infrastructure mega projects As Chinese public banks play an increasingly important role in the region the book also demonstrates that there is a risk of governments undercutting their own standards By contrast this book shows that making infrastructure work for everyone involved requires mutually reinforcing networks of support and accountability among communities governments and development banks This book led by an expert multi disciplinary international team will be of considerable interest to researchers in the fields of development and development economics geography anthropology and ecology as well as practitioners in development banks and in government regulatory and foreign aid agencies
