

Operating Instructions for Model 2134 Work Light

Rechargeable Floodlight - Spotlight

INS-2134-17

CAUTION: Do not use this work light in explosive atmospheres, near flammable liquids, or where explosion-proof lamps are required. Do not immerse in water.
CAUTION: For light duty work only.

Thank you for purchasing this Bayco work light. Save these instructions. Please read these instructions before using your work light. Be sure to charge the work light before the first use.

CHARGING

Initial Use

Fully charge the work light before the first use. If the battery is new or has been unused for several months, several charge and discharge cycles may be needed to reach full battery capacity. To reach maximum performance, run the light to completely discharge the battery and then recharge. Each charge cycle will extend the operation time until maximum capacity is achieved. The charge time for maximum capacity is approximately 8 hours.

Regular Use

Use only the supplied AC charging adapter.

- For best performance, charge the work light when the LED's start to dim.
- Connect the AC power adapter to the light. The red indicator will light.
- The red light indicates the work light is being charged. The red light remains on until the battery is fully charged. At full charge, the light turns off. The total time to full charge varies depending on the remaining charge in the battery pack.
- Keep the work light plugged into the charger to maintain a trickle charge.

SAFETY

CAUTION BRIGHT LED RADIATION: AVOID DIRECT EYE EXPOSURE. The light is a Class 2 LED product per IEC 60825-1 Edition 1.2.2001.

- Do not use or charge this work light in explosive or hazardous areas.
- Do not attempt to repair or disassemble the work light or the charger power supply.
- Use only the supplied AC charger.

TIPS TO EXTEND BATTERY LIFE

The work light NMH internal battery pack does not have a memory effect. Charging the work light often helps extend its useful life.

- A new work light or one that has not been used for a long period of time may not accept a full charge initially. This is normal and does not indicate a problem. Fully discharge and then charge the unit several times to condition the battery pack for full capacity. As the battery pack capacity increases the charge time shortens.
- Charge the unit after each use, whether the work light is fully discharged or not.
- Store the work light at room temperature.

OPERATION FOR 2134

The work light has a 2 position rocker switch to activate either the floodlight or spotlight. The center position turns the light off. The magnetic hook can be placed on the top of the light or the side.
