Men and Women in the Household of God Korinna Zamfir, 2013-04-10 Korinna Zamfir explores the manner in which the Pastoral Epistles redefine roles and ministries within a changed ecclesiological

framework the *ekklesia* as *oikos* Theou The contextual investigation focuses on the cultural and social background of the station codes and church orders Applying the environmental approach advanced by Abraham Malherbe Zamfir discusses the Pastoral Epistles as writings intimately linked to their Greco Roman social and cultural environment The volume addresses the mentalities reflected in moral philosophies political theories drama and epigraphy focusing on the discourse articulated in these sources Exploring the adoption of conservative mentalities the monograph advances a reading of the Pastoral Epistles based on ideology critique It also incorporates insights gained from research on the social world of earliest Christianity in particular on private associations Korinna Zamfir argues that the ecclesiology of the Pastoral Epistles presupposes the metaphorical use of *oikos* Theou and shows that in Greco Roman antiquity *oikos* denotes larger social entities like the religious association the polis and the cosmos The *ekklesia* is the *oikos* and polis of God As a consequence the Pastoral Epistles define roles and ministries based on the public private divide and on honor and shame mentality The theological and cosmic dimension of the household of God explains the essentialist understanding of social and ecclesial roles The author also tackles the contrast between discourse and ecclesial reality

Working-Class Courtship, Marriage, and Divorce in Scotland, 1855–1939 Eleanor Gordon, Jeff Meek, Katie Barclay, 2025-10-25 This is the first book length study of the history of working class courtship and marriage in Scotland from the establishment of civil registration to the introduction in 1939 of legislation which abolished irregular marriage and introduced civil marriage Adopting a life course approach the book explores the social economic and cultural contexts of romantic partnerships from courtship through to marital or family dissolution Drawing from a wide range of sources that capture official accounts and discourses on the one hand and the testimony and experience of working class people on the other the book offers a uniquely broad and textured view of courtship and marriage in this period In so doing it advances recent historiographical debates surrounding marriage in the Anglophone world particularly the mutability of love and whether the late nineteenth and early twentieth centuries constituted a social and cultural turning point for the working classes in terms of choice of marriage partner the nature of the marital relationship and the parent child relationship The book also engages with debates about extra marital sexual activity in the nineteenth and early twentieth centuries whether the family was more or less stable than the contemporary family and the different ways that marriages broke down before the advent of divorce reform This has important implications for wider European and North American historiography and raises timely questions about the primacy of the traditional family in policy and public discourse
