

Kaufman Brief Intelligence Test, Second Edition (KBIT-2)

Examiner: Lynn Menden, School Psychologist

The Kaufman/Kaufman Brief Intelligence Test, Second Edition (KBIT-2) is a brief measure of the verbal and nonverbal intelligence of a wide range of children, adolescents, and adults, ages 4 through 90. The KBIT-2 is a screening measure of intelligence composed of two subtests: Matrices and Vocabulary. Scores from these two subtests are combined to form the IQ Composite, which serves as the measure of intelligence on the KBIT-2.

For two subtests (Verbal Knowledge and Matrices) of the instrument, the student is shown pictures on a tablet-on-card and asked questions about them. The student points to the correct answer on the card. For the third subtest (Picture) the student is asked questions and provides spontaneous verbal responses.

Verbal Subtest

Verbal Knowledge

The Verbal Knowledge subtest is the first subtest in the verbal intelligence portion of the instrument. This subtest contains two types of items. One type measures receptive vocabulary, in which the examinee sees a word and the student points to the picture that best illustrates the word. The other type measures general information about the world (history, geography, the arts, science, etc.). In these items, the examinee asks a general information question and the student points to the picture that best illustrates the answer.

Picture

The Picture subtest is the third subtest in the instrument, and the second verbal intelligence test. The Picture subtest measures verbal comprehension, reasoning, and vocabulary knowledge. No reading is involved. The examinee sees a picture and the student responds with the single word that answers the riddle. The examinee records the response.

Nonverbal Subtest

Matrices

The Matrices subtest is the second subtest and is the only test of non-verbal intelligence in the instrument. This subtest measures the participant's ability to solve non-pictorial, pairwise relationships, and complete verbal analogies. The examinee identifies the object in the bottom row that's related conceptually to the object shown above.

Handbook of Clinical Child Psychology Johnny L. Matson, 2023-06-10 This comprehensive handbook explores the many issues affecting children's physical and mental health. Its coverage spans a broad range of topics exploring the history and foundations of clinical child psychology as well as the discipline's theories, research base, ethical and legal implications, and diagnostic systems including the NIMH's Research Domain Criteria (RDoC). The handbook examines family risk factors for children, e.g., parental stress, divorce, and depression, and provides leading edge reviews of cognitive variables, e.g., theories of memory, executive function, theories of intelligence, theory of mind, and cognitive tempo. In addition, it describes methods of assessment including checklists, interviews, and methods of treatment, e.g., cognitive behavior therapy, mindfulness, and family therapy. Chapters focus on assessment of specific diagnostic categories such as depression, anxiety, selective mutism, ADHD, and pediatric topics including chronic pain, childhood cancer, childhood obesity, and toilet training. Finally, the book addresses such emerging issues as gender diversity, social justice, cyberbullying, internet gaming disorder, and the impact of COVID-19. Key areas of coverage include Foundations of clinical child psychology, Cognition and clinical child psychology, Testing, assessment, and treatment methods in child psychology, Neurodevelopmental and pediatric disorders in childhood, Assessment and treatments for challenging behaviors in children, Assessment and treatments for psychopathologies in children. The *Handbook of Clinical Child Psychology* is a must-have resource for researchers, professors, graduate students, clinicians, therapists, and professionals in clinical child and school psychology, child and adolescent psychiatry, social work, public health, pediatrics, as well as special education, developmental psychology, nursing, and all interrelated disciplines.

Counseling Assessment and Evaluation Joshua C. Watson, Brandé Flamez, 2014-07-24 Designed to help students learn how to assess clients, conduct treatment planning, and evaluate client outcomes, this practical book addresses specific CACREP competencies. Incorporating case studies and examples, authors Joshua C. Watson and Brand Flamez provide foundational knowledge for sound formal and informal assessments, cover ethical and legal considerations in assessment, describe basic statistical concepts, highlight the domains in which assessments are commonly used (intelligence, aptitude, achievement, personality, career, etc.) and provide strategies for integrating assessment data when working with clients. *Counseling Assessment and Evaluation* is part of the SAGE Counseling and Professional Identity Series, which targets specific competencies identified by CACREP Council for Accreditation of Counseling and Related Programs.

A Comprehensive Guide to Child Psychotherapy and Counseling Christiane Brems, 2008-03-19 Christiane Brems, an experienced clinician, supervisor, and educator, presents a metatheoretical yet practical guide to working with children ages 3 to 12 years. She draws heavily on developmental, interpersonal, family systems, and self-psychological schools of thought and integrates the core components of all of these approaches in a clear and concise manner. She stresses the need for intensive assessment to precede conceptualization and treatment planning so that treatment techniques are dictated by the needs of each child and family. Brems has contoured the third edition to meet the practical needs and expectations of students and practitioners.

Divided among four sections the chapters follow the logical development of clinicians mirroring the natural flow of work with children from the practitioners self exploration to learning about special aspects of children such as diversity and development to awareness about the special needs and demands of children as related to environmental legal and ethical issues Brems prepares clinicians to discover their own personal traits that may facilitate or hinder their work with children She walks child therapists and counselors through the initial stages of intake assessment and conceptualization The material on assessment instruments is thoroughly updated discussions refer to the latest versions of instruments and if new instruments emerged that meet one of the purposes deemed essential to child treatment they are included The text contains case examples each illustrating a specific therapeutic technique
