War Department,1944 **Getting Medieval** Carolyn Dinshaw,1999-09-22 In *Getting Medieval* Carolyn Dinshaw examines communities dissident and orthodox in late fourteenth and early fifteenth century England to create a new sense of queer history Reaching beyond both medieval and queer studies Dinshaw demonstrates in this challenging work how intellectual inquiry into pre modern societies can contribute invaluable to current issues in cultural studies In the process she makes important connections between past and present cultures that until now have not been realized In her pursuit of historical analyses that embrace the heterogeneity and indeterminacy of sex and sexuality Dinshaw examines canonical Middle English texts such as the *Canterbury Tales* and *The Book of Margery Kempe* She examines polemics around the religious dissidents known as the Lollards as well as accounts of prostitutes in London to address questions of how particular sexual practices and identifications were normalized while others were proscribed By exploring contemporary mis appropriations of medieval tropes in texts ranging from Quentin Tarantino s *Pulp Fiction* to recent Congressional debates on U S cultural production Dinshaw demonstrates how such modern media can serve to reinforce constrictive heteronormative values and deny the multifarious nature of history Finally she works with and against the theories of Michel Foucault Homi K Bhabha Roland Barthes and John Boswell to show how deconstructionist impulses as well as historical perspectives can further an understanding of community in both pre and postmodern societies This long anticipated volume will be indispensable to medieval and queer scholars and will be welcomed by a larger cultural studies audience Railway Signaling and Communications ,1960 *Principles of Communication Engineering* A.K.Chhabra,2006 The first four chapters of the text describe different types of signals modulation and demodulation of these signals various transmission channels and noise encountered by the signals during propagation from sender to receiver end Apart from this this part of the book also deals with different forms of line communication systems A brief introduction of information theory is also given at the end of the text so that the students become familiar with this aspect of communication systems *Current Population Survey Interviewing Manual* ,1994 **The Stockholm County Medical Information System** H. Peterson,2012-12-06 The writing

of this text arose through the opportunity of one author D F to spend a sabbatical leave studying the developments within the Stockholm County health operations The computerization project that had started virtually 10 years previously focussed on the Danderyd hospital had received continuing attention in the world scene It therefore seemed an appropriate site for study for one charged with responsibility for developing computerized hospital information systems An intent to assemble a private report became an attempt to write a public monograph when it was discovered that the leaders of the Stockholm project had aspired for some time to put their work more cohesively in the public domain Since any such publication would be in English and oriented to an international market the involvement of one extraneous author representative of that market obviously had its appropriateness in language interest and detachment The resulting book is unusual if not unique because of its lengthy and detailed description of one system Starting from an introduction to Sweden and the local health care system it proceeds through to detailed descriptions of user procedures terminal displays and computer files Undoubtedly some readers will question the merit in having such detail particularly as it relates to outmoded equipment and a locally developed programming language Yet some of those same readers might well be among those many people who ask elsewhere why we should repeatedly re invent the wheel in the computer industry The Signal Engineer ,1923
