This psychobiographical study of the renowned French pediatrician and psychoanalyst Françoise Dolto introduces both her theories of child development and her unique insights into language and identity A friend of Jacques Lacan's Dolto believed that we are all humanized through language and that the words we use carry unconscious traces of our early histories of love suffering and desire Suggesting that infants unconsciously symbolize and that a continuous circulation of unconscious affects the transference prevails in all language based relations her findings challenge assumptions about autism autobiography linguistics literacy pedagogy and therapy Dolto's own corpus a rich archive blending the personal and professional demonstrates this with echoes between Dolto's constructs about the child and her own challenging childhood This fascinating book will not only introduce the work of Françoise Dolto to many readers but will be a valuable resource for all psychoanalytic researchers and theorists interested in childhood language and identity

Birth to Psychic Life Albert Ciccone, Marc Lhopital, 2022-03-30 Based on rich clinical experience and on theory from numerous psychoanalytical works this book explores and analyzes the emergence and development of the psychic life. Birth to Psychic Life explores the genesis of the psychic apparatus reconstructs the development of subjectivity with its ups and downs in babies as in all subjects and studies the relationship between mental states at the dawn of psychic life and those characteristic of psychopathology. The book refers to Freudian Kleinian and post Kleinian works proposing articulations between the different theoretical models. The referenced works contributions to the understanding of early psychic disorders as well as to the implications of infantile psychic suffering in adulthood are essential. The authors identify the three psychic constellations recognized by many that accompany the psychic birth and suggest new more adequate names in view of current works on subjectivity: the auto sensual position the symbiotic position and the depressive position. Many other new and original proposals are developed by the authors. Providing tools to think about the processes of psychic growth this book will be of interest to all psychoanalysts and psychotherapists working with infants and interested in the impact of early psychic development throughout life.

Endings Fausta Ferraro, Alessandro

Garella, 2009 Ever since Analysis Terminable and Interminable the termination of therapy has placed the clinical and metapsychological levels of psychoanalytic thought in a dialectical tension The rereading proposed by the authors situates Freud and Ferenczi as two poles of a debate which is still ongoing psychoanalytic literature demonstrates the convergences divergences and hybridizations which have come about through time the various schools and the geography of analysis The authors explore the development of the termination process and within this the termination event as a final moment each with its own characteristics The beginning of the termination process constitutes a critical moment in the analysis one we may investigate through the conceptual lens of liminality a sort of threshold or border that is useful for the reading of a wide range of phenomena related to termination Every termination is nonetheless incomplete and it is against this backdrop that the authors theoretical reflection and clinical experience interact suggesting a typology of analytic termination From this a map of a little explored terrain emerges where we see a mixing of the boundaries between interior and exterior reality individual and couple goals and theoretical aims and concrete aspirations all requiring a meticulous task of reconnaissance
