Mbk Flipper Manual:

Flipper User's Manual W. Z. Strang, WRIGHT RESEARCH AND DEVELOPMENT CENTER WRIGHT-PATTERSON AFB OH., 1990 Multi block computational fluid dynamics solvers require a tremendous amount of input data before a solution can be obtained. This data primarily exists in two files when using the WRDC FIMM developed multi block Euler solver MERCURY. The first contains the numerical grid while the other holds the boundary conditions and block connection information, the connectivity file. One is often interested in the asymmetrical flow about a symmetrical configuration. Rather than manually constructing the grid and connectivity datasets for a full symmetric configuration, it is much more efficient to let a computer program automatically generate such datasets from the symmetric portion. FLIPPER is a computer program that reflects any MERCURY grid and boundary condition connectivity information about the zero plane. MGB Haynes, 2010. This special edition of the MGB Owners Workshop Manual has been prepared as part of the celebrations to commemorate the 50th anniversary of J H Haynes Co Ltd. It is a faithful reproduction of the original both in layout and in technical content, but all the photographs have been reshot in colour.
