2014-06-03 The Conference of the Tongues offers a series of startling reflections on fundamental questions of translation It throws new light on familiar problems and opens up some radically different avenues of thought It engages with value conflicts in translation and the social accountability of translators and turns the old issue of equivalence inside out Drawing on a wealth of contemporary and historical examples the book teases out the translator's subject position in translations makes notions of intertextuality and irony serviceable for translation studies tries to think translation without transformation and uses a controversial sociological model to cast a cold eye on the entire world of translating This is a highly interdisciplinary study that remains aware of the importance of theoretical paradigms as it brings concepts from international law social systems theory and even theology to bear on translation Self reference is a recurrent theme The book invites us to read translations for what they can tell us about translating and about translators own perceptions of their role The argument throughout is for more self reflexive translation studies Works, in an English literature Peter I s policy of forced Westernization resulted in translation becoming a widely discussed and highly visible practice in Russia a multi lingual empire with a polyglot elite Yet Russia s accumulation of cultural capital through translation occurred at a time when the Romantic obsession with originality was marginalizing translation as mere imitation The awareness on the part of Russian writers that their literature and by extension their cultural identity were born in translation produced a sustained and sophisticated critique of Romantic authorship and national identity that has long been obscured by the nationalist focus of traditional literary studies By offering a re reading of seminal works of the Russian literary canon that thematize translation alongside studies of the circulation and reception of specific translated texts Translation and the Making of Modern Russian Literature models the long overdue
