**Human Insecurities in Southeast Asia** Paul J. Carnegie, Victor T. King, Ibrahim, 2016-08-30 This book is a collection of work by scholars currently pursuing research on human security and insecurities in Southeast Asia. It deals with a set of insecurities that is not readily understood or measurable. As such, it conceptually locates the threats and impediments to human security within relationships of risk, uncertainty, safety, and trust. At the same time, it presents a wide variety of investigations and approaches from both localized and regional perspectives. By focusing on the human and relational dimensions of insecurities in Southeast Asia, it highlights the ways in which vulnerable and precarious circumstances, human insecurities, are part of daily life for large numbers of people in Southeast Asia and are mainly beyond their immediate control. Many of the situations people experience in Southeast Asia represent the real outcomes of a range of largely unacknowledged socio-cultural, economic transformations interlinked by local, national, regional, and global forces, factors, and interests. Woven from experience and observations of life at various sites in Southeast Asia, the contributions in this volume give an internal and critical perspective to a complex and manifold issue. They draw attention to a variety of the less-than-obvious threats to human security and show how perplexing those threats can be. All of which underscores the significance of multidisciplinary approaches in rethinking and responding to the complex array of conditioning factors and interests underlying human insecurities in Southeast Asia.

*Storying Multipolar Climes of the Himalaya, Andes and Arctic* Dan Smyer Yü, Jelle J.P. Wouters, 2023-03-23 This book initiates multipolar climate/clime studies of the world's altitudinal and latitudinal highlands with terrestrial, experiential, and affective approaches. Framed in the environmental humanities, it is an interdisciplinary comparative study of the mutually embodied relations of climate, nature, culture, and place in the Himalaya, Andes, and Arctic. Innovation-driven, the book offers multipolar climate/clime case studies through the contributors' historical findings, ethnographic documentations, and diverse conceptualizations and applications of climate/clime, an overlooked but returning notion of place embodied with climate history, pattern, and changes. The multipolar climate/clime case studies in the book are geared toward deeper, lively explorations and demonstrations of the translatability, interchangeability, and complementarity between the notions of climate/clime and climate. Multipolar or multipolarity in this book connotes not only the two polar regions and the tectonically shaped highlands of the earth but also diversely debated perspectives of climate studies in the broadest sense. Contributors across the twelve chapters come from diverse fields of social and natural sciences.

and humanities and geographically specialize respectively in the Himalayan Andean and Arctic regions The first comparative study of climate change in altitudinal and latitudinal highlands this will be an important read for students academics and researchers in environmental humanities anthropology climate science indigenous studies and ecology Chapters 8 and 9 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com/books/e/10.4324/9781003347026> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
