The book then moves on to describe the innovations in green retreading technology, abrasion and flex fatigue deterioration of tyre tread. State of the art methods for the inspection and testing of old tyres before rubberisation and after retreading are examined in detail as well as techniques for the testing of basic raw materials and process testing of prepared rubber compounds. Nanotechnology potentially the bringer of a revolution in the field of tyre retreading and the development of the run flat tyre are described in some depth in this book.
