Impact Evaluation in Practice; La Evaluación de Impacto en la Práctica Paul J. Gertler, Sebastian Martinez, Patrick Premand, Laura B. Rawlings, Christel M. J. Vermeersch, 2011-06-13 This book offers an accessible introduction to the topic of impact evaluation and its practice in development While the book is geared principally towards development practitioners and policymakers designing prospective impact evaluations we trust that it will be a valuable resource for students and others interested in using impact evaluation Prospective impact evaluations should be used selectively to assess whether or not a program has achieved its intended results or to test alternatives for achieving those results We consider that more and better impact evaluation will help strengthen the evidence base for development policies and programs around the world If governments and development practitioners can make policy decisions based on evidence including evidence generated through impact evaluation our hope is that development resources will be spent more effectively and ultimately have a greater impact on reducing poverty and improving people s lives The three chapters in this handbook provide a non technical introduction to impact evaluations including Why Evaluate in Chapter 1 How to Evaluate in Chapter 2 and How to Implement Impact Evaluations in Chapter 3 These elements are the basic tools needed in order to successfully carry out an impact evaluation From a methodological standpoint our approach to impact evaluation is largely pragmatic we think that the most appropriate methods should be identified to fit the operational context and not the other way around This is best achieved at

the outset of the program through the design of prospective impact evaluation that can be built into the project's implementation. We argue that gaining consensus between key stakeholders and identifying an evaluation design that fits the political and operational context is as important as the method itself. We also believe strongly that impact evaluations should be upfront about their limitations and caveats. Finally, we strongly encourage policymakers and program managers to consider impact evaluations in a logical framework that clearly sets out the causal pathways by which the program works to produce outputs and influence final outcomes and to combine impact evaluations with monitoring and selected complementary evaluation approaches to gain a full picture of performance. This book builds on a core set of teaching materials developed for the Turning Promises to Evidence workshops organized by the office of the Chief Economist for Human Development HDNCE in partnership with regional units and the Development Economics Research Group DECRG at the World Bank.

Impact Evaluation in International Development Paul Glewwe, Petra Todd, 2022-03-25

Impact evaluations are studies that attempt to measure the causal impact of a project, program, or policy on one or more outcomes. This book provides a comprehensive exposition of how to conduct impact evaluations. Part I provides an overview of impact evaluations and comprises five chapters which are accessible to readers who have few or none of the technical statistical and econometric skills that are needed to conduct impact evaluations. Parts II and III make use of statistical and econometric methods and are at a level similar to a graduate student course but written to make them accessible to the ambitious reader whose skills are not at that level. Part II presents in Chapters 6–10 a comprehensive discussion of the use of randomized controlled trials (RCTs) to conduct impact evaluations, including a general discussion of the ethical issues involved in conducting impact evaluations. Part III presents the main nonexperimental methods that are used to implement impact evaluations when RCTs are not feasible or not recommended for other reasons. Chapters 11 and 12 present regression methods, including difference-in-differences estimation. Matching methods are described in Chapter 13, after which regression discontinuity methods are covered in Chapter 14. Instrumental variable methods, including the estimation of local average treatment effects (LATE), are discussed in detail in Chapter 15. Chapters 16 and 17 cover more advanced topics: quantile treatment effects and control function methods, respectively. Part IV then considers more practical issues when conducting impact evaluations, including designing questionnaires (Chapter 18), data collection methods and survey management (Chapters 19 and 20), and disseminating results to policymakers (Chapter 21). Finally, Part V addresses two topics in impact evaluation: qualitative methods for conducting impact evaluations (Chapter 22) and cost-benefit and cost-effectiveness analysis (Chapter 23).

This book offers an accessible introduction to the topic of impact evaluation and its practice in development. While the book is geared principally towards development practitioners and policymakers designing prospective impact evaluations, we trust that it will be a valuable resource for students and others interested in using impact evaluation. Prospective impact evaluations should be

used selectively to assess whether or not a program has achieved its intended results or to test alternatives for achieving those results We consider that more and better impact evaluation will help strengthen the evidence base for development policies and programs around the world If governments and development practitioners can make policy decisions based on evidence including evidence generated through impact evaluation our hope is that development resources will be spent more effectively and ultimately have a greater impact on reducing poverty and improving people s lives The three chapters in this handbook provide a non technical introduction to impact evaluations including Why Evaluate in Chapter 1 How to Evaluate in Chapter 2 and How to Implement Impact Evaluations in Chapter 3 These elements are the basic tools needed in order to successfully carry out an impact evaluation From a methodological standpoint our approach to impact evaluation is largely pragmatic we think that the most appropriate methods should be identified to fit the operational context and not the other way around This is best achieved at the outset of the program through the design of prospective impact evaluation that can be built into the project s implementation We argue that gaining consensus between key stakeholders and identifying an evaluation design that fits the political and operational context is as important as the method itself We also believe strongly that impact evaluations should be upfront about their limitations and caveats Finally we strongly encourage policymakers and program managers to consider impact evaluations in a logical framework that clearly sets out the causal pathways by which the program works to produce outputs and influence final outcomes and to combine impact evaluations with monitoring and selected complementary evaluation approach to gain a full picture of performance This book builds on a core set of teaching materials developed for the Turning Promises to Evidence workshops organized by the office of the Chief Economist for Human Development HDNCE in partnership with regional units and the Development Economics Research Group DECRG at the World Bank

to development professionals and policymakers **Facilitating Evaluation** Michael Quinn Patton, 2017-10-23 Michael Quinn Patton's *Facilitating Evaluation: Principles in Practice* is the first book of its kind to explain in depth and detail how to facilitate evaluation processes with stakeholders. Using the author's own stories of his experiences as an evaluation facilitator, the book illustrates the five evaluation facilitation principles that are the organizing framework for addressing how to work with stakeholders to generate evaluation questions, make decisions among methods, interpret findings, and participate in all aspects of evaluation. Ultimately, this book will help readers perform facilitation to enhance the relevance, credibility, meaningfulness, and utility of evaluations. A must read for anyone considering a high impact evaluation. Margaret Lombe, Boston College.
