The self-regulation aspects as well as the ownership and involvement emphasized in the book went beyond the traditional cognitive strategies endorsed in most books. Marc Simmons, Principal, Ilwaco Middle School, Ocean Beach School District, Long Beach, WA. The ideas in this book are brought to life with examples of teachers and students in the classroom. The teacher voices, comments, and quotes lend credibility and are a big component of the book's strengths, as well as the visuals and graphics. Nurturing Minds: An Integrated Journey Through Child Development and Educational Psychology 2025 1. Dr. Savita Saloman 2. Dr. Divya Sharma 3. Dr. Jaya Singh 4. Dr. Gopa Sharma, PREFACE Children do not enter school as blank slates or single types. They arrive as whole persons, growing bodies, reasoning minds, shifting emotions, emerging values, and living cultures. *Nurturing Minds: An Integrated Journey Through Child Development and Educational Psychology* was written to honor that wholeness and to give teachers a coherent practice-ready map for cultivating it in real classrooms. This book responds to two persistent needs. First, educators seek clear guidance on what develops when, from infancy through adolescence, and how growth across biological, cognitive, socio-emotional, language, and moral domains interrelates. Second, they want bridgework: concrete routines, tools, and lesson structures that translate theory into everyday teaching. We integrate global research with India's rich intellectual heritage. Vedic thought, the Pa-chā Kośa, a model, and Sri Aurobindo's Integral Education so readers can view learners through complementary lenses rather than a single framework. The volume is organized into four units. Unit

Establish foundations including Indian perspectives on manas buddhi and smriti and a holistic view of potential through the five kosas. Unit II examines stage wise development determinants such as genes nutrition family school and society and the realities of individual differences and special needs with tools for early identification. Unit III explores how children learn comparing Behaviourism Cognitivism Constructivism Information Processing and Integral approaches and shows when to blend them. Unit IV turns to motivation and classroom climate offering humane strategies that sustain engagement and order. Each chapter is designed for direct application a concept map and learning outcomes a classroom vignette core ideas in plain language. From Theory to Practice routines and checklists an Inclusive Lens for adapting instruction quick assessment probes and a Reflect practitioners can dip in while planning teaching or troubleshooting. Several commitments run through the text: evidence informed practices that have been classroom tested; dignity and inclusion as non negotiables; cultural responsiveness that draws on local languages and contexts while building global competencies and practical transfer so tools move easily into lesson plans IEP meetings parent conferences and professional development. By the end readers should be able to interpret behaviour developmentally distinguish what won't do from what can't do yet design experiences that balance guidance and independence use observation and quick diagnostics to recognize learning diversity early and build motivating classrooms where routines relationships and relevance sustain effort and curiosity. Just as importantly the book offers a shared language of development and learning for teachers families and school leaders. We are indebted to the students whose questions sharpened our thinking the teachers who opened their classrooms and the traditions scientific and philosophical that remind us education is both skill and soul. If these pages help you see a learner more clearly or make one routine more humane they will have served their purpose. Editors: Dr Savita Saloman Dr Divya Sharma Dr Jaya Singh Dr Gopa Sharma. *Stepping up Lesson Study* Aki Murata, Christine Kim-Eng Lee, 2020-11-26. This is a much needed book for educators who want to learn more than just the surface features of lesson study to deepen the process and learning. Bringing together current knowledge and resources from lesson study practitioners and researchers all over the world this book provides models and examples of how teachers can learn more deeply and how to support them to learn more in lesson study. The chapters connect current research educational theories to classroom practices and are filled with examples to illustrate how deeper learning looks with lesson study for example highlighting the research process paying attention to educative talk using of case pupils students as the teachers focus doing kyouzai kenkyuu well facilitating mock up lessons and so forth. This is not a basic how to handbook of lesson study and readers can choose chapters with topics of interest to learn and use the new ideas promptly in their work. Coming from the global network of lesson study educators the book not only provides new learning guides but also provides stories of how lesson study has been adopted in different cultures and educational contexts.
