Stromberg - First Class Scientist, Second Class Citizen: Letters From The Gulag And A History Of Electroanalysis In The Ussr

Richard Guy Compton, Gregory George Wildgoose, Elza A Zakharova, Alexander S Kabakaev, Michael T Stawpert, 2011-03-31

Armin G Stromberg was arguably one of the founding fathers of the technique of stripping voltammetry frequently used in chemical analysis yet he is virtually unheard of in Western scientific circles He was a brilliant scientist but due to his German ancestry he was interred in one of the NKVD GULAG camps at the outbreak of the Second World War This semi biographical history presents the complete set of 74 surviving letters written by Stromberg to his wife during this period The letters provide both historians and the interested public with a rare and unique glimpse into the everyday living conditions of inmates in one of the GULAG labour camps The book also traces Stromberg's life following his release More importantly it relates how he founded the thriving Tomsk school to the wider historical context of electroanalysis in the USSR drawing conclusions about the rate of scientific development as compared to the West and showing how wet analysis remained of vital importance to industry long after equivalent measurements were made elsewhere Readers will also appreciate how Stromberg's invaluable contributions in the Tomsk School of Electroanalysis laid the foundations for the extensive metallurgical extraction and nuclear industries that dominated the entire Siberian region for many years This book is a must read for anyone interested in the life and times of an important yet often overlooked scientist of the Second World War

**Letters**, 1929 **Letters on the Short Story** Anton Pavlovich Chekhov, 1924 **Letters on the Short Story, the Drama and Other Literary Topics** Anton Pavlovich Chekhov, 1924 Letters from Yellowstone Diane Smith, 2000-06-01

For readers of Larry McMurtry's *Lonesome Dove*, Elizabeth Gilbert's *The Signature of All Things* and Hope Jahren's *Lab Girl*, Diane Smith's warmhearted and award-winning epistolary novel about a spunky young woman who joins a makeshift field study in Yellowstone National Park at the end of the nineteenth century. I loved this book in a way that I haven't loved a book in some time. James Welch, author of *Fools Crow*, in the spring of 1898, A. E. Alexandria Bartram, a spirited young woman with a love for botany, is invited to join a field study in Yellowstone National Park. The study's leader, a mild-mannered professor from Montana, assumes she is a man and is less than pleased to discover the truth. Once the scientists overcome the shock of having a woman on their team, they forge ahead on a summer of adventure, forming an enlightening web of relationships as they move from Mammoth Hot Springs to a camp high in the backcountry. But as they make their way collecting amid Yellowstone's beauty, the group is splintered by differing views on science, nature, and economics. Brimming with humor, excitement, and the romance of the Yellowstone landscape, *Letters from Yellowstone* is a love letter to the joys of scientific discovery and America's majestic natural beauty, as well as a thoughtful reflection on environmentalism, Native American displacement, and feminism at the dawn of a new century.
