The Logic Programming Paradigm Krzysztof R. Apt, Victor W. Marek, Mirek Truszczyński, David S. Warren, 2012-12-06 Logic Programming was founded 25 years ago This exciting new text reveals both the evolution of this programming paradigm since its inception and the impressively broad scope of current research in Logic Programming The contributions to the book deal with both theoretical and practical issues They address such diverse topics as computational molecular biology machine learning mobile computing multi agent systems planning numerical computing and dynamical systems database systems an alternative to the formulas as types approach program semantics and analysis and natural language processing The contributors are all leading world experts in Logic Programming and their contributions were all invited and refereed **Functional and Logic Programming** Yuki Yoshi Kameyama, Peter J. Stuckey, 2004-03-24 This book constitutes the refereed proceedings of the 7th International Symposium on Functional and Logic Programming FLOPS 2004 held in Nara Japan in April 2004 The 18 revised full papers presented together with 3 invited contributions were carefully reviewed and selected from 55 submissions The papers are organized in topical sections on logic and functional logic programming applications program analysis rewriting types and modules logic and semantics and functional programming **Logic Programming** Michael Maher, 1996 Includes tutorials invited lectures and refereed papers on all aspects of logic programming including Constraints Concurrency and Parallelism Deductive Databases Implementations Meta and Higher order Programming Theory and Semantic Analysis September 26 1996 Bonn Germany Every four years the two major international scientific conferences on logic programming merge in one joint event JICSLP 96 is the thirteenth in the two series of annual conferences sponsored by The Association for Logic Programming It includes tutorials invited lectures and refereed papers on all aspects of logic programming including Constraints Concurrency and Parallelism Deductive Databases Implementations Meta and Higher order Programming Theory and Semantic Analysis The contributors are international with strong contingents from the United States United Kingdom France and Japan Logic Programming series Research Reports and Notes **Evidence-Based Surgery** Achilles Thoma, Sheila Sprague, Sophocles H. Voineskos, Pablo E. Serrano, Charles H. Goldsmith, 2025-06-27 Now in a revised second edition this book is a comprehensive guide to teach surgeons surgical fellows and surgical residents regardless of their specialty the skills to appraise what they encounter in the surgical literature Surgeons need to be able to understand what they read before applying the conclusions of a surgical article to their practice As most surgeons do not have the extra training in health research methodology understanding how the research was done

how to interpret the results and finally deciding to apply them to the patient level can be a difficult task Chapters included here explain the methodological issues pertaining to the various study designs reported in the surgical literature Readers are taught how to search the literature for the best evidence that will answer the surgical problem under discussion An identified article that seems relevant to the problem under investigation can be appraised by addressing three key questions 1 Is the study I am reading valid 2 what are the results of this study and 3 can I apply these results to my patients Chapters new to this edition discuss cluster RCTs network meta analyses enhanced recovery after surgery ERAS and core outcome sets COS While the primary goal of Evidence Based Surgery is to teach surgeons how to appraise the surgical literature an added benefit is that the concepts explained here may help research minded surgeons produce higher quality research
