Bulletin United States. Office of Education,1965 **Landscapes of Communism** Owen Hatherley,2016-03-01 When communism took power in Eastern Europe it remade cities in its own image transforming everyday life and creating

sweeping boulevards and vast epic housing estates in an emphatic declaration of a noncapitalist idea The regimes that built them are now dead and long gone but from Warsaw to Berlin Moscow to postrevolutionary Kiev the buildings remain often populated by people whose lives were scattered by the collapse of communism Landscapes of Communism is a journey of historical discovery plunging us into the lost world of socialist architecture Owen Hatherley a brilliant witty young urban critic shows how power was wielded in these societies by tracing the sharp sudden zigzags of official communist architectural style the superstitious despotic rococo of high Stalinism with its jingoistic memorials palaces and secret policemen s castles East Germany s obsession with prefabricated concrete panels and the metro systems of Moscow and Prague a spectacular vindication of public space that went further than any avant garde ever dared Throughout his journeys across the former Soviet empire Hatherley asks what if anything can be reclaimed from the ruins of Communism what residue can inform our contemporary ideas of urban life

Imagining the West in Eastern Europe and the Soviet Union Gyorgy Peteri, 2010-11-28 This volume presents work from an international group of writers who explore conceptualizations of what defined East and West in Eastern Europe imperial Russia and the Soviet Union The contributors analyze the effects of transnational interactions on ideology politics and cultural production They reveal that the roots of an East West cultural divide were present many years prior to the rise of socialism and the Cold War The chapters offer insights into the complex stages of adoption and rejection of Western ideals in areas such as architecture travel writings film music health care consumer products political propaganda and human rights They describe a process of mental mapping whereby individuals captured and possessed Western identity through cultural encounters and developed their own interpretations from these experiences Despite these imaginaries political and intellectual elites devised responses of resistance defiance and counterattack to defy Western impositions Socialists believed that their cultural forms and collectivist strategies offered morally and materially better lives for the masses and the true path to a modern society Their sentiments toward the West however fluctuated between superiority and inferiority But in material terms Western products industry and technology became the ever present yardstick by which progress was measured The contributors conclude that the commodification of the necessities of modern life and the rise of consumerism in the twentieth century made it impossible for communist states to meet the demands of their citizens The West eventually won the battle of supply and demand and thus the battle for cultural influence
