Living in the Environment George Tyler Miller, 2003-01-02 Miller's LIVING IN THE ENVIRONMENT 13th Edition is a science based book designed for introductory courses in environmental science. Tyler Miller is the most successful author in environmental science instruction because of his attention to currency, trend setting, presentation, outstanding student and instructor supplements, and his ability to retain and refine the pedagogical hallmarks on which instructors have come to depend. In this edition, Miller has added an on-line Web-based resource entitled the Resource Integration Guide, which is updated quarterly with CNN Today video clips, animations, and articles from InfoTrac College Edition. Instructors can seamlessly incorporate current news articles and research findings to support classroom instruction. And for the first time ever, students will receive a complementary CD-ROM entitled Interactive Concepts in Environmental Science. This groundbreaking addition integrates nearly 100 engaging animations and interactions with chapter summaries, flashcards, and Web-based quizzes. Organized by chapter, students will find links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves. The content in the Thirteenth Edition of LIVING IN THE ENVIRONMENT is everything you have come to expect and more. There is more information on ecology and basic science than ever before. Instructors can continue to expect high quality end-of-chapter questions, an orientation toward solutions and prevention, rather than clean up the integration of Web resources, and balanced presentation of controversial ideas that are supported through Pro-Con diagrams and discussions.
