

The relation between the OIE *Terrestrial Manual* and the OIE *Terrestrial Code*

- Although the OIE list of Prescribed and Alternative Tests gives only summary descriptions of the tests (e.g. “ELISA”, or “PCR”) it should not be assumed that all tests under that description are suitable for international movement. Only the method described in the *Terrestrial Manual* should be used, or else a method that has been fully validated to show equivalent performance to the designated Prescribed Test method. “Validation” in this context means compliance with the OIE validation template and the more detailed description in the validation chapter of the *Terrestrial Manual*.

the Encyclopedia of Food Safety provides unbiased and concise overviews which form in total a comprehensive coverage of a broad range of food safety topics which may be grouped under the following general categories History and basic sciences that support food safety Foodborne diseases including surveillance and investigation Foodborne hazards including microbiological and chemical agents Substances added to food both directly and indirectly Food technologies including the latest developments Food commodities including their potential hazards and controls Food safety management systems including their elements and the roles of stakeholders The Encyclopedia provides a platform for experts from the field of food safety and related fields such as nutrition food science and technology and environment to share and learn from state of the art expertise with the rest of the food safety community Assembled with the objective of facilitating the work of those working in the field of food safety and related fields such as nutrition food science and technology and environment this work covers the entire spectrum of food safety topics into one comprehensive reference work The Editors have made every effort to ensure that this work meets strict quality and pedagogical thresholds such as contributions by the foremost authorities in their fields unbiased and concise overviews on a multitude of food safety subjects references for further information and specialized and general definitions for food safety terminology In maintaining confidence in the safety of the food supply sound scientific information is key to effectively and efficiently assessing managing and communicating on food safety risks Yet professionals and other specialists working in this multidisciplinary field are finding it increasingly difficult to keep up with developments outside their immediate areas of expertise This single source of concise reliable and authoritative information on food safety has more than ever become a necessity

Foot and mouth disease vaccination and post-vaccination monitoring Food and Agriculture Organization of the United Nations, 2018-08-21 Foot and mouth disease FMD control and or eradication efforts have been in existence for many years in different regions supported by an official OIE system for recognition of national control programmes and of country status to manage the trade risks for FMD reintroduction A global FMD control strategy was announced by FAO and OIE in 2012 incorporating a progressive control pathway for FMD PCP FMD that elaborates principles for the application of control measures in a step wise manner The OIE Performance of Veterinary Services tool helps countries to monitor the structures essential for programme implementation Vaccination is an important component of programmes that seek to reduce the impacts of FMD and to block circulation of the causative virus in order to establish and maintain disease freedom Choosing and successfully implementing the appropriate vaccine and vaccination regimens are affected by many dynamic factors including 1 the diversity of the viruses to be controlled 2 the performance characteristics and instability of vaccines 2 the range of susceptible animal species and husbandry systems 3 the purposes of vaccination 4 the short lived nature of vaccine induced immunity and 5 the design and application of vaccination programmes Furthermore vaccination is unlikely to succeed unless supported by other complementary control measures Therefore the entire process of vaccine selection and vaccination must be continuously

monitored and evaluated to ensure that it fulfils its objectives and contributes to a sustainable control of FMD This document is intended to help guide this process Since the variable and changing circumstances of FMD control require different approaches the guidance is not prescriptive Instead it reviews the options available for vaccine selection and vaccination strategies and presents methodology to check that a potential vaccine is able to provide a protective immune response and that the implemented vaccination programme has translated this into a protective level of population immunity
