

Writing Task 2

Task: Write **three or three** well-developed paragraphs using MEAL structure to address the prompt. You must cite textual evidence from two texts of your choice and analyze that evidence within your paragraphs. Remember to address the prompt for both texts.

Prompt: Identify a **central theme** in two texts and analyze how the author's use of **one** writing strategy (literary element or technique) develops the central theme.

In both texts *The Universal Declaration of Human Rights* by the UN Commission on Human Rights and *A True Refuge* by Aung San Suu Kyi, the central idea is that basic rights must be fought for and protected. Although one text is a declaration and one text is a speech, both texts serve to persuade their audience. For instance, *The Universal Declaration of Human Rights* states "It is essential, if man is not to be compelled to have recourse, as a last resort, to rebellion against tyranny and oppression, that human rights should be protected by the rule of law", on page 9 lines 12-13. This quote conveys the message that once the government has made it clear that it will not protect or help its people, it is the citizen's duty to rebel against wrongdoing and force the protection of their rights. This statement is meant to be acknowledged by different nations and to encourage other governments to protect their people. Furthermore, this statement is meant for nations to understand that when citizens are angry and rebelling it is because there seems to be no other way to fight for equity. Lastly, in *A True Refuge* by Aung San Suu Kyi the author states: "The greatest threats to global security today come not from the economic deficiencies of the poorest nations but from religious, racial (or tribal) and political dissensions raging in those regions where principles and practices which could reconcile the diverse instincts and aspirations of mankind have been ignored, repressed or distorted", page 11 lines 3-5. This quote means that what threatens our

How Students Write: A Linguistic Analysis Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first year student writing. *How Students Write* brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers, and ultimately learn to construct knowledge in their writing. Drawing on both first year and upper level student writing, the book examines the discourse of students at different points in their education. It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students' choices. In focusing on sentence level features such as hedges, perhaps, and boosters, this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas. Attention to these features can help instructors foster civil discourse, design effective assignments, and expose and question norms of higher education.

Immigrant Children and Youth Alberto M. Bursztyn Ph.D., Carol Korn-Bursztyn, 2015-07-14 Immigrants now comprise one fourth of the 75 million children in the United States. The ability of today's immigrant children to become productively engaged adults hinges on their internal resources and mental health. This book ascertains their psychological challenges and their often misunderstood needs. This book is intended to inform both the general public and professionals working with immigrant children and adolescents about the importance and complexity of addressing their psychological issues and experiential challenges. The work covers the topic of immigrant children's mental health from multiple perspectives while maintaining a focus on developmental needs and identifying the specific problems posed by linguistic and cultural transition. The chapters present case studies and vignettes that serve to illustrate the topics, providing vivid depictions of mental health issues and highlighting the importance of specific interventions. As new immigrant groups continue to settle in the United States, the social and emotional well-being of their children has far-reaching implications for the future of our society, making this volume of critical significance to therapists, educators, policymakers, child advocates, and other audiences.

History Lessons S.G. Grant, 2014-04-04 In this book, extended case studies of two veteran teachers and their students are combined with the extant research literature to explore current issues of teaching, learning, and testing U.S. history. It is among the first to examine these issues together and in interaction. While the two teachers share several similarities, the teaching practices they construct could not be more different. To explore these differences, the author asks what their teaching practices look like, how their instruction influences their students' understandings of history, and what role statewide exams play in their classroom decisions. *History Lessons: Teaching, Learning, and Testing in U.S. High School Classrooms* is a major contribution to the emerging body of empirical research in the field of social studies education, chiefly in the subject area of history, which asks how U.S. students make sense of history and how teachers construct their classroom practices. Three case study chapters are paired with three essay reviews.

chapters intended to help readers analyze the cases by looking at them in the context of the current research literature Two concluding chapters extend the cases and analyses the first looks at how and why the teachers profiled in this book construct their individual teaching practices in terms of three distinct but interacting sets of influences personal organizational and policy factors the second explores the prospects for promoting what the author defines as ambitious teaching and learning Many policymakers assume that standards based reforms support the efforts of ambitious teachers but until we better understand how they and the students in their classes think and act that assumption is hollow at best This book is a must have for faculty and students in the field of social studies education and broadly relevant across the fields of curriculum studies and educational policy
