East Asia and Food (In)Security Shaun Breslin,Christopher W. Hughes,2017-10-02 This book presents a study of perceptions of food insecurity in East Asia and explores how individual countries are developing strategies to deal with the situation It also looks at how the perception of food insecurity has increasingly influenced the nature of international interactions not just within East Asia but also in the region s relations with major external actors Many of the challenges facing East Asia are generic food security issues that face people and governments across the world for example the implications of climate change and demographic

changes on food supplies This book places the East Asian context in the wider discussion of food in security in global politics However it also identifies potential regional differences for example the significance of rice for the region and the unavoidable impact of China as a major regional player What the Chinese state and Chinese companies decide to do in response to concerns about food insecurity have an impact not just on the rest of the region but on the rest of the world Taking too much of a Sinocentric focus however ignores other actors in East Asia or merely relegates discussion to how they respond to Chinese policies or external strategies This book considers the region as a whole both when it comes to thinking about food security challenges and responses within the region itself and also in the outward projection of regional food insecurity on the rest of the world This book was published as a special issue of The Pacific Review

*International Anti-Corruption Norms* Cecily Rose, 2015-08-13 This book traces the creation of international anti corruption norms by states and other actors through four markedly different institutions the Organisation for Economic Co operation and Development the United Nations the Extractive Industries Transparency Initiative and the Financial Action Task Force Each of these institutions oversees an international instrument that requires states to combat corruption Yet only the United Nations oversees anti corruption norms that take the sole form of a binding multilateral treaty The OECD has by contrast fostered the development of the binding 1997 OECD Anti Bribery Convention as well as non binding recommendations and guidance associated with treaty itself In addition the revenue transparency and anti money laundering norms developed through the Extractive Industries Transparency Initiative and the Financial Action Task Force respectively take the form of non binding instruments that have no relationship with multilateral treaties The creation of international anti corruption norms through non binding instruments and informal institutions has the potential to privilege the interests of powerful states in ways that raise questions about the normative legitimacy of these institutions and the instruments they produce At the same time the anti corruption instruments created under the auspices of these institutions also show that non binding instruments and informal institutions carry significant advantages The non binding instruments in the anti corruption field have demonstrated a capacity to influence domestic legal systems that is comparable to if not greater than that of binding treaties With corruption and money laundering at the forefront of political debate *International Anti Corruption Norms* provides timely expertise on how states and international institutions grapple with these global problems **India in**
