Katz, Cristina Cacciari, Raymond W. Gibbs Jr., Mark Turner, 1998-09-10 Our understanding of the nature and processing of figurative language is central to several important issues in cognitive science including the relationship of language and thought how we process language and how we comprehend abstract meaning Over the past fifteen years traditional approaches to these issues have been challenged by experimental psychologists linguists and other cognitive scientists interested in the structures of the mind and the processes that operate on them In *Figurative Language and Thought* internationally recognized experts in the field of figurative language Albert Katz Mark Turner Raymond W Gibbs Jr and Cristina Cacciari provide a coherent and focused debate on the subject The book's authors discuss a variety of fundamental questions including What can figures of speech tell us about the structure of the conceptual system If and how should we distinguish the literal from the nonliteral in our theories of language and thought Are we primarily figurative thinkers and consequently figurative language users or the other way around Why do we prefer to speak metaphorically in everyday conversation when literal options may be available for use Is metaphor the only vehicle through which we can understand abstract concepts What role do cultural and social factors play in our comprehension of figurative language These and related questions are raised and argued in an integrative look at the role of nonliteral language in cognition This volume a part of Counterpoints series will be thought provoking reading for a wide range of cognitive psychologists linguists and philosophers **Metaphor and Thought** Andrew Ortony, 1995 **Metaphor and Thought** Andrew Ortony, 1979

Metaphor and Metonymy revisited beyond the Contemporary Theory of Metaphor Francisco

González-García, María Sandra Peña Cervel, Lorena Pérez Hernández, 2013-10-30 The contributions in this volume go beyond the Contemporary Theory of Metaphor complementing it in a number of relevant ways Some of the papers argue for a more dynamic interdisciplinary approach to metaphor looking into it from semiotic psychological and socio cultural perspectives Other contributions focus on the crucial role played by metaphor and metonymy in meaning construction at a discourse textual level Finally the volume also includes proposals which revolve around the alleged universal nature of metaphorical mappings and their suitability to account for grammatical phenomena The contributions in this volume display an ample gamut of theoretical approaches pointing to the viability of taking a functional cognitive stance on the analysis of metaphor and metonymy in contrast to a purely cognitive one This book is structured into three major sections i the Contemporary Theory of Metaphor revisions and recent developments ii metaphor and or metonymy across different discourse genre types and iii the Contemporary Theory of Metaphor current applications Originally published in Review of Cognitive Linguistics 9 1 2011

Metaphor Wars Raymond W. Gibbs, Jr, 2017-05-04 The study of metaphor is now firmly established as a central topic within cognitive science and the humanities We marvel at the creative dexterity of gifted speakers and writers for their special talents in both thinking about certain ideas in new ways and communicating these thoughts in vivid poetic forms Yet metaphors may not only be special communicative devices but a fundamental part of everyday cognition in the form of conceptual metaphors An enormous body of empirical evidence from cognitive linguistics and related disciplines has emerged detailing how conceptual metaphors underlie significant aspects of language thought cultural and expressive action Despite its influence and popularity there have been major criticisms of conceptual metaphor This book offers an evaluation of the arguments and empirical evidence for and against conceptual metaphors much of which scholars on both sides of the wars fail to properly acknowledge

The Moral Metaphor System Ning Yu, 2022-06-27 This book investigates moral metaphors in English and Chinese applying conceptual metaphor theory to a comparative study of the linguistic manifestation of the moral metaphor system rooted in the domains of bodily and physical experience Ning Yu sheds light on the metaphorical nature of moral cognition and how it is systematically manifested in language and explores the potential commonalities that define moral cognition in general as well as the differences that characterize distinct cultures The work investigates moral cognition at the cultural level as reflected in language based on linguistic evidence from both English and Chinese and to a limited extent multimodal evidence from the corresponding cultures The moral metaphor system is taken to consist of three major subsystems referred to as physical visual and spatial These subsystems are clusters of conceptual metaphors whose source concepts are from domains of embodied experiences in the physical world and which are formulated in contrastive categories with bipolar values for the target concepts of moral and immoral The study is characterized by two keywords system and systematicity The former refers to the fact that metaphors conceptual and linguistic are connected within networks and the latter to the need for those metaphors to be studied in such networks
