smoothing out the flow Smoothing out the flow is divided further into When the work is coming in When the product person is going through the process How the work is performed In addition the author includes newly created tools and training content For example a data gathering table points the facilitator to what data need to be collected when Training for the team includes making sure they understand the structure of a process as well as to instruct them and define how a Lean process actually functions This distinction is important because all improvements are not necessarily Lean improvements Several bodies of knowledge are incorporated into this guide not only Lean and Six Sigma but internal auditing organizational development and statistics Essentially this guide includes tips nuances and original tools that are missing from the traditional training of facilitators of kaizen events It provides enough information for the facilitator to think in a creative way
