Decontamination and Device Processing in Healthcare Gerald E. McDonnell, Georgia Alevizopoulou, 2025-01-08 Prevent infections within healthcare spaces with safe and effective device decontamination and processing Prevention is the first line of defense against infection particularly in a world where microbial resistance to anti infectives like antibiotics is a growing threat Few aspects of managing a healthcare facility are

more immediately important to patient care than the safe use of equipment and devices. Although some devices are designed for single use, many more are designed to be reused, and there have been increasing reports of infections and other adverse patient reactions due to these devices, in particular when regarding surgical and endoscopic procedures. The decontamination or processing of various surfaces, spaces, and devices associated with patient care is a life-saving discipline demanding dedicated resources and education. *Decontamination and Device Processing in Healthcare*, Second Edition, meets this demand as a comprehensive training and reference manual for the decontamination and processing of equipment and devices used in patient care environments.
