

# DULUTH HIGH SCHOOL SCIENCE FAIR

## I. Science Fair Rationale:

Science Fair allows the science student a chance to do "real science". Coursework provides science facts and formulas, but conducting a scientific investigation gives a student the practice in time management and the use of variables, research, observation and analytical skills that a student needs if interested in a career in a demanding field.

## II. General Information:

In this course, you will have to do the following during 1<sup>st</sup> Semester.

1. Develop your own **original idea** for a scientific investigation (you must experimentally solve a problem using real data)
2. Conduct research that helps you develop a hypothesis
3. Plan experimental procedures using appropriate scientific methods
4. Gather necessary materials and complete any necessary forms in a timely manner.
5. Perform the experiment, **taking photographs** and collecting data
6. Organize and display your data
8. Analyze your data and draw conclusions
9. Compile a formal report summarizing your work.

All the while, you must keep an up-to-date logbook; turn in required papers and forms. By **Dec. 3** submit a formal research paper summarizing your science fair project and research.

The following Science Fair-related work is OPTIONAL:

If you are asked to enter Duluth High's Science Fair (December 9th), the benefits to you would include:

- **1 point** added to your final **fall** semester average if you enter the school science fair
- **1 point** to your final **spring** semester average for advancing to the district fair. **Note:** you must actually GO to the fair; not just be asked to go.
- **1 point** (additional) to your final **spring** semester average for advancing to the state fair.
