HEALTH AND HEALING AT YOUR FINGERTIPS

Throw out the bottles and boxes of drugs in your house. A new theory suggests that medicine could be bad for your health, which should at least come as good news to people who cannot afford to buy expensive medicine. However, it is a blow to the medicine industry, and an even bigger blow to our confidence in the progress of science. This new theory argues that healing is at our fingertips: we can be healthy by doing Reiki on a regular basis.

Supporters of medical treatment argue that medicine should be trusted since it is effective and scientifically proven. They say that there is no need for spiritual methods such as Reiki, Yoga, Tai Chi. These waste our time, something which is quite precious in our material world. There is medicine that can kill our pain, x-rays that show us our fractured bones or MRI that scans our brain for tumors. We must admit that these methods are very effective in the examples that they provide. However, there are some "every day complaints" such as back pains, headaches, insomnia, which are treated currently with medicine. When you have a headache, you take an Aspirin, or Vermidon, when you cannot sleep, you take Xanax without thinking of the side effects of these. When you use these pills for a long period, you become addicted to them; you cannot sleep without them. We pay huge amounts of money and become addicted instead of getting better. How about a safer and more economical way of healing? When doing Reiki to yourself, you do not need anything except your energy so it is very economical. As for its history, it was discovered in Japan in the early 1900s and its popularity has spread particularly throughout America and Western Europe. In quantum physics, energy is recognized as the fundamental substance of which the universe is composed. Reiki depends on the energy within our bodies. It is a simple and effective way of restoring the energy flow. There are no side effects and it is scientifically explained.
