Preschool Assessment Marla R. Brassard, Ann E. Boehm, 2008-09-16 Education Assessment and Documentation in Early Childhood Education Maarit Alasuutari, Ann-Marie Markström, Ann-Christine Vallberg-Roth, 2014-01-21 Documentation in early childhood education is typically seen as a means to enhance the quality of care and education and as a way to take account of the child's view. Assessment and Documentation in Early Childhood Education considers the increasing trend towards systematic child documentation especially in early childhood institutions. The authors present ways in which assessment and evaluation is done sometimes explicitly but more often implicitly in these practices and explore its means, aims, forms and functions. They also examine the rationalities of child documentation from the perspective of professional practice and professionalism and suggest that documentation and assessment practices can weaken and constrain but also empower and strengthen teachers, children and parents. Topics explored include: Different forms of documentation and assessment; Documentation and listening to the children; Dilemmas of assessment and documentation; Participation by children; Involvement of parents. This timely book will be appealing for those studying in the field of early childhood education, teacher education, special education, general education, social work, counselling, psychology, sociology, childhood studies and family studies.

Studying Teachers in Early Childhood Settings Bernard Spodek, Olivia Saracho, 2003-05-01 The chapters in this volume reflect the impact that teachers have on their students when they stand in front of the classroom and the effect their performance has on children such as teachers' gender, preparation, certification, knowledge, beliefs, cognitive style, creativity, accountability and other actions on the part of the teachers. They describe research related to the preparation and certification or credentialing of early childhood practitioners, the issues regarding the nature of early childhood practice and the needs of the field as it prepares for the future.

Progress, Change and Development in Early Childhood Education and Care Elizabeth Coates, Dorothy Faulkner, 2017-10-02 In 2000 the Millennium Development Goals set out targets aimed at creating a safer, more prosperous and more equitable world. If these goals were to be achieved, children's lives would indeed be transformed. In this collection, achievements against these targets are identified with each contributor examining the progress made in early years provision in Australia, China, England, Greece, the Netherlands, Portugal, South Africa and Sweden. They highlight the priorities and agendas of their respective governments and focus on the trends and issues which are particularly relevant to each situation, thereby revealing the social and educational inequalities that persist across countries. A common theme running through this volume concerns the political tensions that arise when governments and educators hold fundamentally different views about the nature and purpose of early years education and the needs of children and families. It is clear that although the past two decades have seen many changes in attitude towards the importance of the early years of life, politically, economically and environmentally, much still remains to be done if the Millennium Development Goals for young children and their families are to be fully met. Despite this, this volume demonstrates that those who work in

this area continue to experience a deep concern for the well being of young children which transcends cultures frontiers and political and sectarian divides This book was originally published as a special issue of the International Journal of Early Years Education
