

Figure 1. Short segment of poly(ethene).

Poly(ethene) consists of many ethene (C_2H_4) molecules covalently bonded together (represented by the black lines). The covalent bonds at the end have been left empty to represent the long length of the chain.

Figure 2. Repeating Unit. A more efficient way to represent polymers is through drawing the smallest repeating unit. The figure represents the smallest repeating unit ethene (C_2H_4) in brackets with bonds coming out of the bracket to represent the next repeating unit. The 'n' is a large number and illustrates just how big the polymer is!
