Conference of Fracture ECF16 was held in Greece July 2006 It focused on all aspects of structural integrity with the objective

of improving the safety and performance of engineering structures components systems and their associated materials Emphasis was given to the failure of nanostructured materials and nanostructures including micro and nano electromechanical systems MEMS and NEMS Sandwich Structures 7: Advancing with Sandwich Structures and Materials O.T. Thomsen,E. Bozhevolnaya,A. Lyckegaard,2006-01-16 Sandwich structures represent a special form of a laminated composite material or structural elements where a relatively thick lightweight and compliant core material separates thin stiff and strong face sheets The faces are usually made of laminated polymeric based composite materials and typically the core can be a honeycomb type material a polymeric foam or balsa wood The faces and the core are joined by adhesive bonding which ensures the load transfer between the sandwich constituent parts The result is a special laminate with very high bending stiffness and strength to weight ratios Sandwich structures are being used successfully for a variety of applications such as spacecraft aircraft train and car structures wind turbine blades boat ship superstructures boat ship hulls and many others The overall objective of the 7th International Conference on Sandwich Structures ICSS 7 is to provide a forum for the presentation and discussion of the latest research and technology on all aspects of sandwich structures and materials spanning the entire spectrum of research to applications in all the fields listed above Proceedings of the First International Conference on Theoretical, Applied and Experimental Mechanics Emmanuel E. Gdoutos,2018-05-26 ICTAEM_1 treated all aspects of theoretical applied and experimental mechanics including biomechanics composite materials computational mechanics constitutive modeling of materials dynamics elasticity experimental mechanics fracture mechanical properties of materials micromechanics nanomechanics plasticity stress analysis structures wave propagation During the conference special symposia covering major areas of research activity organized by members of the Scientific Advisory Board took place ICTAEM_1 brought together the most outstanding world leaders and gave attendees the opportunity to get acquainted with the latest developments in the area of mechanics ICTAEM_1 is a forum of university industry and government interaction and serves in the exchange of ideas in an area of utmost scientific and technological importance
