Michael Porter and innovation expert Elizabeth Teisberg reveal the underlying and largely overlooked causes of the problem and provide a powerful prescription for change The authors argue that participants in the health care system have competed to shift costs accumulate bargaining power and restrict services rather than create value for patients This zero sum competition takes place at the wrong level among health plans networks and hospitals rather than where it matters most in the diagnosis treatment and prevention of specific health conditions Redefining Health Care lays out a breakthrough framework for redefining health care competition based on patient value With specific recommendations for hospitals doctors health plans employers and policy makers this book shows how to move to a positive sum competition that will unleash stunning improvements in quality and efficiency
