## Error Codes

### Error Description Codes SPACE

#### General

Here follows a list of all the possible error messages from the SPACE systems program, a short description of them and the action taken by the errors. The different actions are:

- ERR\_STOP                      The error stops in the PDS (pink)
- EMER\_STOP                   Emergency Stop (impulsive deactivated)
- LO\_SPEED                     The max allowed speeds are reduced to  $em\_speed\%$
- LOS\_SPEED                    The full error boom LOS speed reduction is set for the different functions  $em\_speed$  used if the crane doesn't have LOS
- LO\_LOAD                       The max allowed loads for inner boom, outer boom and  $\beta$  is reduced to  $em\_load\%$  of what the max allowed speed otherwise should be.
- STOP\_OUT                      The out-direction for the extension and  $\beta$ -extension are stopped.
- PDS\_DUMP                      SPACE asks the PDS to switch off the dump supply. This action is automatically deactivated the first 10 seconds after power-on.

Most of the errors are reset automatically when the faulty condition disappears, but a few errors requires to be reset manually. A manual reset can be done with the terminal (ERRORS / CLEAR) or by switching the SPACE power off and on.
