Kyle,2019-05-16 This

book is an attempt to address two struggles for theistic educators e.g. those who approach their educational vocation from a religious perspective whether they are working in secular or faith based institutions The first struggle is that while numerous guidelines on teaching excellence have been compiled the resulting checklists can contain more than a hundred criteria to consider This book therefore identifies the evidence based guidelines that are likely to have the highest impact on student achievement thereby empowering educators to focus their efforts in more substantial ways The second struggle is related to the lack of resources which can help educators to view and approach their vocation from a theistic perspective While there are texts that discuss the relationship of spirituality and or theology to education few to date have sought to bring evidence based educational literature into dialogue with the western Christian tradition and thereby develop a bottom up theology of education This book addresses this historical and theological gap Overall this book is therefore intended to not only provide theistic educators with high impact guidelines that can significantly improve the quality of education in their school systems but it also strives to do so from a thoroughly theistic perspective

Argumentation in Science Education Sibel Erduran, María Pilar Jiménez-Aleixandre, 2007-12-06 Our conversations about arguments began in Nashville in the Spring of 1996 in Richard Duschl's doctoral seminar that we were both attending Marilar Jim nez Aleixandre as a visiting scholar at Vanderbilt University Jim nez Aleixandre and Duschl were designing authentic problems in genetics for the University of Santiago de Compostela based RODA project aimed at engaging high school students in argumentation Erduran and Duschl had been working on Project SEPIA extending their work in Pittsburgh schools to the design of curricula that support epistemological aspects of scientific inquiry including argumentation In that

spring we attended a NARST session in St Louis where Gregory Kelly Steven Druker and Catherine Chen presented a paper about argumentation As a consequence a symposium about argumentation was organised possibly the first of its kind at the 1997 NARST meeting in Chicago including papers from Kelly and colleagues and from Jimenez Alexandre Bugallo and Duschl The symposium was attended among others by Rosalind Driver who had just submitted an application for funding of an argumentation project based at King's College London a project Erduran would incidentally work on after Driver's untimely death From this time frame in the 1990s to the present day argumentation studies in science education have increased at a rapid pace from stray papers for which we were unable to find an appropriate strand in a conference to a wealth of research base exploring ever more sophisticated issues
