updated edition of Alex Wright's previously published *Glut* continues the journey through the history of the information age to show how information systems emerge. Today's information explosion may seem like a modern phenomenon but we are not the first generation or even the first species to wrestle with the problem of information overload. Long before the advent of computers, human beings were collecting, storing, and organizing information from Ice Age taxonomies to Sumerian archives, Greek libraries to Christian monasteries. Wright weaves a narrative that connects such seemingly far-flung topics as insect colonies, Stone Age jewelry, medieval monasteries, Renaissance encyclopedias, early computer networks, and the World Wide Web. He suggests that the future of the information age may lie deep in our cultural past. We stand at a precipice struggling to cope with a tsunami of data. Wright provides some much-needed historical perspective. We can understand the predicament of information overload not just as the result of technological change but as the latest chapter in an ancient story that we are only beginning to understand.

Graph Transformations Hartmut Ehrig, 2004-09-17 This book constitutes the refereed proceedings of the Second International Conference on Graph Transformation ICGT 2004 held in Rome, Italy, in September-October 2004. The 26 revised full papers presented together with three invited contributions and summaries of 2 tutorials and 5 workshops were carefully reviewed and selected from 58 submissions. The papers are organized in topical sections on integration, technology, chemistry, and biology, graph transformation concepts, DPO theory for high-level structures, analysis and testing, graph theory and algorithms, application conditions, and logic transformation of special structures and object orientation.

Reskilling and Upskilling in the Age of AI Joanna Rosak-Szyrocka, Sumit Tripathi, Manuel B. Garcia, Giuseppe Festa, Markus A. Launer, 2025-11-13 This book offers a comprehensive guide to navigating the transformation of the workforce due to the influence of artificial intelligence (AI) across industries and discusses detailed strategies for executing reskilling and upskilling programs for professionals and managers in charge of workforce development, training, and employee retention in an AI-driven landscape. As AI continues to reshape sectors and redefine job roles, the need for a strategy for an adaptable and well-equipped workforce has never been more critical. By analyzing AI's integration with other emerging technologies such as blockchain and IoT and their specific impact across sectors, this book prepares readers to meet the unique demands of an AI-driven workforce transformation. Covers strategies for executing reskilling and upskilling programs for professionals and managers in charge of workforce development, training, and employee retention in an AI-driven landscape. Provides actionable insight with a global outlook and offers customized approaches for workforce transformation in key sectors such as healthcare, manufacturing, and finance. Acknowledging the distinct challenges and opportunities across geographies, it includes in-depth case studies from both developed and emerging economies to showcase diverse workforce adaptation strategies. Emphasizes ethical considerations such as data privacy and AI bias, as well as the crucial role of leadership in driving a workforce prepared for AI disruptions. Offers a forward-looking approach to developing resilient, adaptable workers equipped for continuous learning and responsive to rapid technological advances. This
