Genetic Discrimination Gerard Quinn, Aisling de Paor, Peter Blanck, 2014-11-20 As genetic technologies advance genetic testing may well offer the prospect of detecting the onset of future disabilities Some research also forwards that certain behavioural profiles may have a strong genetic basis such as the determination to succeed or the propensity for risk taking As this technology becomes more prevalent there is a danger that genetic information may be misused by third parties and that particular genetic profiles may be discriminated against by

employers by providers of social goods and services such as insurance companies and even by educational facilities This book explores the different forms and potential uses of genetic testing Drawing together leading experts in disability law bioethics health law and a range of related fields it highlights the ethical and legal challenges arising as a result of emerging and rapidly advancing genetic science On examining transatlantic perspectives on the matter chapters in the book ask whether the US Genetic Information Nondiscrimination Act GINA is proving to be an effective tool in addressing the issue of genetic discrimination and alleviating fears of discrimination The book also reviews what insights may be gained from GINA within employment and health insurance contexts and asks how the UN Convention on the Rights of Persons with Disabilities CRPD may impact similar debates within the European Union The book focuses particularly on the legislative and policy framework in the European Union with an emphasis on the gaps in protection and the scope for specific legislative action in this area This book will be of great interest to scholars and students of discrimination law bioethics and disability law and will be of considerable use to legal practitioners medical practitioners and policy makers in this area

Trigeminal Neuralgia Giulia Di Stefano, 2022-11-30 Trigeminal Neuralgia is a unique neuropathic facial pain condition characterized by unilateral paroxysmal pain most often described as stabbing or electric shock like restricted to the distribution of one or more divisions of the trigeminal nerve territory and triggered by innocuous stimuli Trigger zones are reported in virtually the totality of patients and represent the hallmark sign of Trigeminal Neuralgia The development and application of a dedicated software allowed trigger zone overlap profiling of the extraoral and intraoral territories The analysis of the natural history of Trigeminal Neuralgia showed that the failure of the treatment with first line drugs carbamazepine and oxcarbazepine most of the times is not due to the inefficacy of the drug but rather to undesired effects to a level that causes interruption of treatment or a dosage reduction to an insufficient level These results suggest the opportunity to develop a better tolerated drug Winner of the Competition Prize for PhD Thesis 2020 arranged by Sapienza University Press

The Brilliance of Black Children in Mathematics Jacqueline Leonard, Danny B. Martin, 2013-03-01 This book is a critically important contribution to the work underway to transform schooling for students who have historically been denied access to a quality education specifically African American children The first section of the book provides some historical perspective critical to understanding the current state of education in the U S specifically for the education of African American children The following sections include chapters on policy learning ethnomathematics student identity and teacher preparation as it relates to the mathematical education of Black children Through offering counternarratives about mathematically successful Black youth advocating for a curriculum that is grounded in African American culture and ways of thinking providing shining examples of the brilliance of Blacks students and promoting high expectations for all rather than situating students as the problem the authors of this book provide powerful insights related to the teaching and learning of mathematics for African American students As is made evident in this book effective teaching involves much more than just engaging students in

inquiry based pedagogy Kitchen 2003 The chapters offered in this book demonstrate how mathematics instruction for African American students needs to take into account historical marginalization and present day policies that do harm to Black students Kunjufu 2005 Empowering mathematics instruction for African American students needs to take into consideration and promote students cultural spiritual and historical identities Furthermore mathematics instruction for African American students should create opportunities for students to express themselves and the needs of their communities as a means to promote social justice both within their classrooms and communities

Abraham Lincoln's Cyphering Book and Ten other Extraordinary Cyphering Books Nerida F. Ellerton, M. A. (Ken) Clements, 2014-03-26 This well illustrated book provides strong qualitative and comparative support for the main arguments developed by Nerida Ellerton and Ken Clements in their groundbreaking *Rewriting this History of School Mathematics in North America 1607 1861 The Central Role of Cyphering Books* Eleven extraordinary handwritten school mathematics manuscripts are carefully analyzed six were prepared entirely in Great Britain four entirely in North America and 1 partly in Great Britain and partly in North America The earliest of the 11 cyphering books was prepared around 1630 and the latest in 1835 Seven of the manuscripts were arithmetic cyphering books three were navigation cyphering books and one was a mensuration surveying manuscript One of the cyphering books examined in this book was prepared over the period 1819 1826 by a young Abraham Lincoln when he was attending small one teacher schools in remote Spencer County Indiana Chapter 6 in this book provides the first detailed analysis of young Abraham s cyphering book which is easily the oldest surviving Lincoln manuscript Another cyphering book this one prepared by William Beattie in 1835 could have been prepared as a special gift for the King of England The analyses make clear the extent of the control which the cyphering tradition had over school mathematics in North America and Great Britain between 1630 and

1840 In their final chapter Ellerton and Clements identify six lessons from their research into the cyphering tradition which relate to present day circumstances surrounding school mathematics These lessons are concerned with sharp differences between intended implemented and attained curricula the remarkable value that many students placed upon their cyphering books the ethnomathematical circumstances which surrounded the preparations of the extraordinary cyphering books and qualitative differences between British and North American school mathematics

Small States and EU Governance Jean Micallef Grimaud,2017-09-06 This book examines a crucial question about small states and their governments influence in the European Union EU decision making processes Are EU small member state governments influential in EU decision making processes In other words do they exercise influence in these processes And if so how and at which stage do they do this This book seeks to answer the above questions by focusing on Malta the smallest state in the EU and whether it exercises influence in uploading its preferences in two distinct stages of EU legislative decision making processes decision shaping formation and decision taking adoption The cases selected and analyzed showcase the Maltese government s behaviour in legislative negotiations in differing EU policy spheres that are extremely relevant to it These are the adoption of EU directives on pyrotechnic articles falling under the EU competition and consumer health and safety policy spheres and on the extension of EU long term residence to beneficiaries of international protection falling under EU immigration policy As analyzed in the latter chapters of the book Malta s government has achieved varying degrees of success in its exercise of influence in these EU decision making processes

Induced plant responses to microbes and insects Corné M. J. Pieterse,Marcel Dicke,Saskia C. M. Van Wees,Erik H. Poelman,2014-04-14 Plants are members of complex communities and interact both with antagonists and beneficial organisms An important question in plant defense signaling research is how plants integrate signals induced by pathogens insect herbivores and beneficial microbes

into the most appropriate adaptive response Molecular and genomic tools are now being used to uncover the complexity of the induced defense signaling networks that have evolved during the arms races between plants and the other organisms with which they intimately interact To understand the functioning of the complex defense signaling network in nature molecular biologists and ecologists have joined forces to place molecular mechanisms of induced plant defenses in an ecological perspective In this Research Topic we aim to provide an on line open access snapshot of the current state of the art of the field of induced plant responses to microbes and insects with a special focus on the translation of molecular mechanisms to ecology and vice versa

Grave injustice Richard A. Stack, 2013-04-30 On September 21 2011 the controversial execution of Georgia inmate Troy Davis who spent twenty years on death row for a crime he most likely did not commit revealed the complexity of death penalty trials the flaws in America s justice system and the rift between those who are for and against the death penalty Davis s execution reignited a long standing debate about whether the death penalty is an appropriate form of justice In *Grave Injustice* Richard A Stack seeks to advance the anti death penalty argument by examining the cases of individuals who like Davis have been executed but are likely innocent By telling the stories of Jesse Tafero Ruben Cantu Carlos DeLuna Cameron Todd Willingham Larry Griffin and

others Stack puts a human face on the ultimate and irrevocable tragedy of capital punishment Although polls indicate Americans favor death sentences approximately three to one many respondents change their position when presented with the facts about capital punishment Stack s compelling descriptions of nineteen wrongful executions illustrate the flaws of the death penalty which he argues is ineffective in deterring crime and costs more than sentences of life without parole He demonstrates that racial disparities in implementation procedural errors incompetent defense attorneys and mistaken eyewitness identifications lead to an alarming number of wrongful convictions But influencing public opinion is only part of the battle to end state sanctioned killing Stack profiles six anti death penalty warriors demonstrating the range of what can be done and what remains to be done to move toward a more compassionate society Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin,2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi
