Latest Engineering Learnership 2014 And 2015:

Vocational Education and Training in Times of Economic Crisis Matthias Pilz, 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training VET Revealing how youth in transition is affected by economic crises it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe e.g. Spain Germany or the UK to Asia such as China Thailand and India Though each country examined in this volume is affected by the economic crisis in a different way the effects are especially apparent for the young generation In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best The contributions in this volume demonstrate that VET alone cannot solve these problems but can be used to support a smooth transition from school to work If the quality of VET is high and the status and job expectations are good VET can help to fill the skills gap especially at the intermediate skill level Furthermore VET can also offer a realistic alternative to the university track for young people in many countries

Contemporary Apprenticeship Reforms and Reconfigurations Thomas DeiBinger, Ursel Hauschildt, Philipp Gonon, 2019 INAP the International Network on Innovative Apprenticeship has steadily grown to incorporate researchers from all over the world In 2019 it's 8th international conference hosted by Konstanz University Germany points to various issues linked to contemporary apprenticeship reforms and reconfigurations which indicates the need for apprenticeships to deliver on its promise of workplace skills and for it to evolve and also to change as the world economies develop Apprenticeship is a model of work and training which has benefits for many different types of economies and societies Specific areas of research are represented in Konstanz by the following topics and from different countries perspectives Governance and Stakeholders Teaching and Learning Academisation in Apprenticeships Diversity and Inclusiveness Internationalisation and Transfer of VET Services Future Work New Employment Patterns Future Work Industry 4.0 School to Work Transition and Youth Employment Modern Fields of TVET Research and Practice

Encyclopedia of Professionalization Didier Demaziere, Richard Wittorski, 2024-10-30 Professionalization has become a given in the worlds of work and education For a wide variety of professions public and private organizations and training and further education courses professionalization is an inescapable reality However it takes on diverse even contradictory meanings according to what it represents a managerial imperative imposed by public or managerial policies or a set of goals defined by an ideal of service or quality of work The purpose of Encyclopedia of Professionalization is to discuss the current challenges facing professionalization and by exploring major research traditions to clarify the meanings associated with this concept and the various phenomena it encompasses Three major notions of professionalization are

examined the manufacturing of professions in pursuit of autonomy the rise of professionalisms embodying notions of a job well done and the construction of renewed professionalities at the very heart of work situations and training systems

A Critical Analysis of National Apprenticeship Training Scheme (NATS) and It's Employability on Technical Graduates: A Case Study of the Eastern Region. DR. S.M. EJAZ AHMAD,2024-12-17 Human resource development policies place a strong emphasis on training and skill improvement The scale of India s present technical training infrastructure is less than what is needed There is also a sizable skill gap between what the market requires in terms of skills and what graduate and diploma programs have to offer Not only is it difficult to establish a significant quantitative expansion of skill training facilities but it s also difficult to improve their quality which is a work that is just as significant The institutional level s capacity for educational and training programs is insufficient to meet the rising demand for the necessary skill sets knowledge and experience Apprenticeships have great promise in fostering our youths starting at the school level especially with several industries experiencing significant skills deficits in the future The National Apprenticeship Training Scheme NATS in India which promotes learning by earning and learning by doing is a potent tool for skill development Important changes have been made to The Apprentices Act 1961 to help freshly graduated students who are joining the workforce receive industrial training and exposure to contemporary industrial procedures The BOAT Boards of Apprenticeship Training situated in Mumbai Kanpur Chennai and the BOPT Board of Practical Training headquartered in Kolkata are the four independent regional organizations through which the Ministry of Education MoE implements the program Despite its significance and the crucial role that skill development plays in the economy it has been discovered that the topic has not recently been investigated Therefore it was crucial to investigate the facts of the apprentices job and training experiences and the business community s opinions regarding NATS and the subject matter of such a scheme Additionally it will assist policymakers academicians and industrialists in comprehending the gaps and choosing their future course of action A CRITICAL ANALYSIS OF THE NATIONAL APPRENTICESHIP TRAINING SCHEME NATS ON EMPLOYABILITY OF TECHNICAL GRADUATES A CASE STUDY OF THE EASTERN REGION has been published The report includes data from numerous stakeholders as well The main areas of focus for the investigation were skill and employability development the role of industries in closing trainees skill gaps the level of awareness about NATS amongst the passing graduates and successful industry institute collaboration through set schedules targeted group discussions and spontaneous dialogues

Training Engineering Students for Modern Technological Advancement Alves, Anabela Carvalho,van Hattum-Janssen, Natascha,2021-12-17 Engineering education leads the preparation of the next generation of engineers This is a difficult task as engineering practices rapidly evolve pressured by the technological advancements promoted by these same engineers Engineering schools are integrated into large and rigid higher education institutions HEI that are not known for their agility Nevertheless engineering educators must have the agility to go beyond HEI boundaries to close the gap

between professional practice needs and engineering education Training Engineering Students for Modern Technological Advancement examines the role of engineering teachers in preparing the next generation of engineers and presents perspectives on active learning methods for engineering education As such it contributes to bypassing the compartmentalized way of course organization typical in many HEIs and prepares for more agile engineering education Covering topics such as game based teaching methods Industry 4 0 and management skills this book is a dynamic resource ideal for engineers engineering professors engineering students general educators engineering professionals academicians and researchers
