from other texts on the market by including a large group of tourism industry practitioners as contributors. These writers practice the principles they espouse and have critical insight into the real world issues facing the tourism industry. They are also very committed to finding best practice solutions to the challenges facing their industry. The book will therefore be of particular interest to tourism managers and policy makers since it provides relevant information for the important decisions they need to make. Throwing the net wide to include medicine, law, psychology, sociology, education and hard science means that a wide range of perspectives are available to address global business insurance security and policy questions in this emerging area of tourism. Shocks such as the terrorist attacks of 11 September 2001, SARS and the more recent Asian Tsunami have made the tourism industry very conscious of the need to protect its customers. This book highlights the positive responses made by various sectors of the industry at destination, national and international levels. It also examines the growing adventure tourism market characterised by small operators who need good risk management practices to weather adverse global events as well as run a financially viable small business. Such a wide set of perspectives will be very valuable to both students and tourism professionals. Engineering Materials and Processes Desk Reference Michael F.

Ashby, Robert W. Messler, Rajiv Asthana, Edward P. Furlani, R. E. Smallman, A.H.W. Ngan, R. J. Crawford, Nigel Mills, 2009-01-06. A one stop desk reference for engineers involved in the use of engineered materials across engineering and electronics, this book will not gather dust on the shelf. It brings together the essential professional reference content from leading international contributors in the field. Material ranges from basic to advanced topics including materials and process selection and explanations of properties of metals, ceramics, plastics and composites. A hard working desk reference providing all the essential material needed by engineers on a day to day basis. Fundamentals, key techniques, engineering best practice and rules of thumb together in one quick reference sourcebook. Definitive content by the leading authors in the field including Michael Ashby, Robert Messler, Rajiv Asthana and R. J. Crawford. **Milwaukee Dual Mode Planning Case Study**
