Qureshi MD,2012-01-31 Nine out of every ten medical students residents and fellows attempt to write a manuscript during their training Yet after finishing the training only 1 or 2 would continue to write scientific manuscripts due to the effort involved in preparing a manuscript Most medical students residents fellows and even junior faculty consider writing a scientific manuscript harder than working grueling hours on the clinical service The manual of scientific manuscript writing was developed to guide for medical students residents fellows and junior faculty by providing a step by step pathway for successful preparation of a manuscript The manual is expected to reduce the usual 3 and 6 months at times frustrating effort to a 1 to 2 week streamlined process to complete a manuscript **Proceedings of the International Conference on Building Materials (ICBM 2024) 31 October - 03 November, Hanoi, Vietnam** Rafat Siddique,Marios Soutsos,Juan Li,Trong-Phuoc Huynh,Tuan Ngo,2025-04-29 This volume presents articles from the International Conference on Building Materials ICBM2024 with the theme Building Materials in the 21st Century held at Hanoi in Vietnam from 31st October to 03rd November The conference is a diversified topic forum for international and Vietnamese researchers academics industry professionals experts and policy makers etc to share their views and to learn from others about recent and current developments in science and technology of building materials in the 21st century and also to discuss actions required for forthcoming building materials as well as construction development in the future The book highlights recent research on cement concrete refractory materials fire resistant materials paints glass product quality testing methods environmental protection and recycling wastes in building material industry *Lactic Acid Bacteria* Wilhelm H. Holzapfel,Brian J.B. Wood,2014-04-29 Lactic Acid Bacteria Biodiversity and Taxonomy Lactic Acid Bacteria Biodiversity and Taxonomy Edited by Wilhelm H Holzapfel and Brian J B Wood The lactic acid bacteria LAB are a group of related microorganisms that are enormously important in the food and beverage industries Generally regarded as safe for human consumption and in the case of probiotics positively beneficial to human health the LAB have been used for centuries and continue to be used worldwide

on an industrial scale in food fermentation processes including yoghurt cheeses fermented meats and vegetables where they ferment carbohydrates in the foods producing lactic acid and creating an environment unsuitable for the survival of food spoilage organisms and pathogens The shelf life of the product is thereby extended but of course these foods are also enjoyed around the world for their organoleptic qualities They are also important to the brewing and winemaking industries where they are often undesirable intruders but can in specific cases have desirable benefits The LAB are also used in producing silage and other agricultural animal feeds Clinically they can improve the digestive health of young animals and also have human medical applications This book provides a much needed and comprehensive account of the current knowledge of the LAB covering the taxonomy and relevant biochemistry physiology and molecular biology of these scientifically and commercially important microorganisms It is directed to bringing together the current understanding concerning the organisms remarkable diversity within a seemingly rather constrained compass The genera now identified as proper members of the LAB are treated in dedicated chapters and the species properly recognized as members of each genus are listed with detailed descriptions of their principal characteristics Each genus and species is described using a standardized format and the relative importance of each species in food agricultural and medical applications is assessed In addition certain other bacterial groups such as Bifidobacterium often associated with the LAB are given in depth coverage The book will also contribute to a better understanding and appreciation of the role of LAB in the various ecosystems and ecological niches that they occupy In summary this volume gathers together information designed to enable the organisms fullest industrial nutritional and medical applications Lactic Acid Bacteria Biodiversity and Taxonomy is an essential reference for research scientists biochemists and microbiologists working in the food and fermentation industries and in research institutions Advanced students of food science and technology will also find it an indispensable guide to the subject Also available from Wiley Blackwell The Chemistry of Food Jan Velisek ISBN 978 1 118 38384 1 Progress in Food Preservation Edited by Rajeev Bhat Abd Karim Alias and Gopinadham Paliyath ISBN 978 0 470 65585 6
