Baden Henry Baden-Powell,1882 *Farming, Fascism and Ecology* Philip Coupland,2016-09-19 The life of Jorian Jenks 1899 1963 has great potential to upset settled assumptions Why did a sensitive and intelligent man from a liberal family become a fascist How did a Blackshirt go green The son of an eminent academic from his childhood onwards Jenks instead longed to farm Lacking the means to do so he worked as a farm bailiff and then in New Zealand as a government agricultural instructor Finally a legacy permitted him to come home and become a tenant farmer Struggling to survive in the economic depression of the 1930s he became an author and activist for rural reconstruction Then having lost faith in the established parties he joined the British Union of Fascists Becoming one of the Blackshirts leading figures he was imprisoned without trial during the war On his release Jenks returned to the struggle this time in the cause of ecology becoming a pioneer of today s organic movement and a founder of the Soil Association This book draws on an extensive range of sources a large proportion of which were previously unseen by historians For the first time it portrays the private and public life of this unusual man revealing many hitherto un glimpsed facets of Jenks life **An Introduction to Mass and Heat Transfer** Stanley Middleman,1997-10-30 This text is the outgrowth of Stanley Middleman s years of teaching and contains more than sufficient materials to support a one semester course in fluid dynamics His

primary belief in the classroom and hence the material in this textbook is that the development of a mathematical model is central to the analysis and design of an engineering system or process. His text is therefore oriented toward teaching students how to develop mathematical representations of physical phenomena. Great effort has been put forth to provide many examples of experimental data against which the results of modeling exercises can be compared and to expose students to the wide range of technologies of interest to chemical, environmental, and bioengineering students. Examples presented are motivated by real engineering applications and many of the problems are derived from the author's years of experience as a consultant to companies whose businesses cover a broad spectrum of engineering technologies.
